大学入学共通テスト 予想問題（2025年度～ 新課程の形式） 第2回

外 国 語
〔英語（リーディング）〕

試験時間 80分	配点 100点	解答数 44	英文の量 約5,280語

テーマ：国際交流・学習アプリ・留学体験・商店街・旅行計画・技術と地域・心理学・アルバイト
80分・100点・大問8・解答数44 オリジナル問題（本文・設問・解説すべて書き下ろし）

注 意 事 項

1 **本番と同じ順で80分で解く**。時間配分の目安：第1～3問 15分／第4問 10分／第5問 13分／第6問 13分／第7問 13分／第8問 14分（見直し2分）。
2 答えは「解答用紙」の番号に○。終わったら「正解と配点」で採点し、「解説」で根拠の場所を確認する。
3 本番の傾向（情報の検索・事実と意見の区別・推敲・複数資料の統合・要約・論理展開）をすべての大問で再現しています。
4 各大問の解説の最初に**本文の要旨（日本語）**があります。読み終えた後の内容確認に使えます。

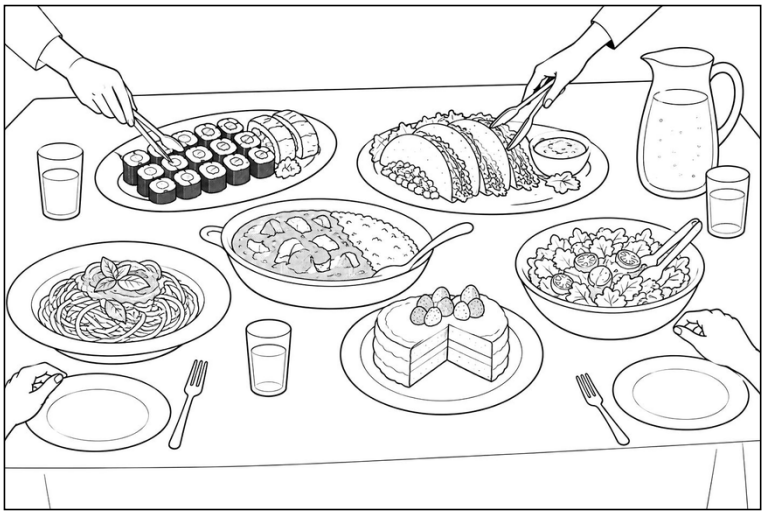

第1問	掲示・お知らせ（情報の読み取り）
第2問	レビュー記事（事実と意見）
第3問	体験談（出来事の順序・心情）
第4問	推敲（下書きとコメント）
第5問	旅程・料金表・メール（複数資料の照合）
第6問	伝記的な文章＋発表メモ（時系列・要点）
第7問	説明文＋図（要点・図の完成・応用）
第8問	複数の資料＋論説文の構成（統合・要約）

第1問 （配点 6）

International Food Night — Potluck Party!

Friday, March 14 · 6:00–8:30 p.m. · School Cafeteria

Bring a dish from your home country or family tradition and share it with everyone! Students, families and teachers are all welcome. Entry is free, and you do not need to bring a dish to join us.

• Please register the name of your dish and its main ingredients on the sign-up sheet outside Room 204 **by Thursday, March 13**.
• To help guests with allergies, write on your label whether your dish contains **nuts, eggs or dairy products**.
• Dishes should be ready to serve. Microwaves will not be available.
• Volunteers to set up tables: meet in the cafeteria at 4:00 p.m.

Last year, more than 120 people came and tried dishes from 18 different countries, from Brazilian cheese bread to Korean pancakes. Please bring enough for about 15 people to taste. If you cannot cook, you are still very welcome: just come and enjoy the food, or help us wash up at the end of the evening.

The student council will provide drinks, plates and forks. Prizes will be given for "Most Colourful Dish" and "Best Story Behind a Dish." Guests will vote by putting a sticker next to their favourites, and the winners will be announced at 8:00 p.m.

問 1 What must people who bring a dish do before the event? **1**

① Heat their dish in the cafeteria microwave.
② Buy drinks and plates for the guests.
③ Meet the student council at 4:00 p.m.
④ Sign up with the name and main ingredients of their dish.

問 2 The labels on the dishes are mainly intended to **2**

① help guests who cannot eat certain foods.
② show which country the dish is from.
③ decide which dish wins a prize.
④ tell guests how much each dish costs.

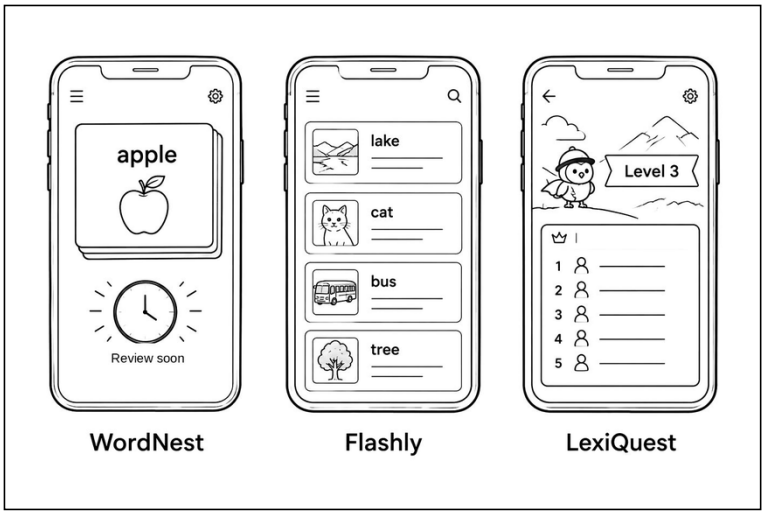

問 3 Which prize focuses on something other than how the food looks or tastes? **3**

① Most Colourful Dish
② Most Delicious Dish
③ Best Story Behind a Dish
④ Fastest Dish to Prepare

第2問 （配点 12）

あなたは英単語の勉強方法を調べていて、イギリスの学生向けウェブマガジンで次の記事を見つけました。

We Tested Three Vocabulary Apps for 30 Days

Three of our student writers each used a different app for 15 minutes a day for a month. At the end, they took the same 100-word test, made up of words their app had introduced. None of the three had used a vocabulary app before, and all of them were preparing for the same English exam in June.

App	Price	Main feature	Words remembered
WordNest	Free (with adverts)	Spaced repetition: words come back just before you forget them	78 / 100
Flashly	£2.99 per month	Photos and example sentences for every word	71 / 100
LexiQuest	£4.99 per month	Game-style levels and a weekly leaderboard	64 / 100

Our verdict: WordNest produced the best test score, and it costs nothing — although the adverts can be annoying. LexiQuest was the most fun to use, but our writer admitted she sometimes rushed through levels just to climb the leaderboard. In our view, the scientific approach of WordNest makes it the smartest choice for exam preparation.

We should also mention that a month is a short time. Spaced repetition is designed to work over many months, so the gap between WordNest and the others might become even larger over a longer period. On the other hand, our LexiQuest tester says she would happily keep using her app, while our WordNest tester admits he found the daily reviews a little boring by the third week.

Comments

Olivia_K: I've used Flashly for a year. The photos really help me picture each word, so it's worth the money for me. I tried WordNest first, but the same cards kept appearing and I got bored.

Kenji_T: Thanks for the test! I use WordNest on the train every morning. I turned off the sound, so the adverts don't bother me much.

Sam1999: Fun is important too! I gave up on two "serious" apps before LexiQuest. A gimmick that keeps you studying beats a perfect method you abandon. I have used LexiQuest every day for five months now, which is a record for me.

問 1 According to the table, which app costs the most? **4**

① WordNest　② Flashly

③ LexiQuest　④ They all cost the same.

問 2 Which of the following is an **opinion** rather than a fact? **5**

① WordNest shows adverts.

② Each writer used an app for 15 minutes a day.

③ The LexiQuest writer scored 64 out of 100.

④ WordNest is the smartest choice for exam preparation.

問 3 Why did the LexiQuest writer sometimes not study carefully? **6**

① She wanted to move up in the ranking.

② The app had too many adverts.

③ She did not have enough time each day.

④ The example sentences were too difficult.

問 4 Sam1999's main point is that **7**

① games are a waste of time for serious learners.

② an app that keeps you motivated may be better than a more efficient one you stop using.

③ Flashly is worth paying for because of its photos.

④ the test in the article was unfair to LexiQuest.

The Water Bottle Manager

by Sota Ishii

When I arrived in Christchurch, New Zealand, for a six-month exchange, my host brother Liam invited me to help his school rugby team. I had never played rugby, so the coach asked me to be the team manager: carrying the kit, filling water bottles and keeping the score book. I agreed, mainly because I did not want to spend every afternoon alone in my room. I had studied English for six years, so I thought I would be fine.

For the first few weeks, I felt invisible. The players spoke so fast, with so many jokes I didn't understand, that I just stood at the side of the field holding bottles. During one match, I gave a bottle to the wrong player twice, and someone shouted something I didn't catch. Everyone laughed. I went home that evening and almost decided to quit. Over dinner, my host mother noticed that I was quiet. "Give it one more week," she said. "People here are friendly, but they need a reason to start talking to you."

Instead, I came up with a small idea. That weekend, I bought a marker pen and wrote each player's name on his bottle — in English and in katakana. At the next practice, the captain, Tama, picked up his bottle and stared at it. "What does this say?" he asked. I explained, and soon everyone was crowding around me, asking how to write their names in Japanese. One player wanted his nickname, "Moose," in katakana too. By the end of the practice, I had written names on the players' bags, boots and even one player's arm.

After that, practice felt different. The players started teaching me rugby words, and I taught them a little Japanese. Tama began calling me "Coach Sota," which was a joke, but a kind one. I still could not catch every joke, but now I laughed with the players instead of feeling that they were laughing at me. Before each match, they lined up to collect their bottles from me, and nobody ever got the wrong one again.

Six months passed more quickly than I had expected. At the final match of the season, our team won by two points. In the changing room, Tama handed me the match ball. "This belongs to the whole team," he said, "and you're part of the team." I still have that ball on my shelf in Japan. Next to it is the marker pen — almost empty.

問 1 Why did Sota feel "invisible" at first? **8**

① The coach would not let him enter the field.
② He was not allowed to talk during matches.
③ Liam stopped going to practice.
④ He could not follow the players' fast speech and jokes.

問 2 Put the following events into the order in which they happened.
9 → **10** → **11** → **12**

① Sota received the match ball.
② Sota handed bottles to the wrong player.
③ Sota taught the players how to play rugby.
④ The captain started calling Sota "Coach Sota."
⑤ Sota wrote the players' names on their bottles.

問 3 What does the almost empty marker pen most likely represent for Sota? **13**

① His regret about wasting money.
② The small action that helped him connect with the team.
③ His wish to become a rugby player.
④ The difficulty of learning katakana.

第4問 （配点 12）

あなたは英語の授業で意見文を書いています。次は Rina の下書きと先生のコメントです。

Bringing Our Shopping Street Back to Life

The shopping street near my house used to be full of people. When I was a child, my grandmother took me there every Sunday to buy fish, tofu and fresh bread. Now, many shops have their shutters down, and some of the owners I remember have retired. I believe our local shopping street is worth saving, and that high school students can play an important role. In this essay, I will give three reasons.

[A], a shopping street is more than a place to buy things. Shop owners know their customers by name, and elderly people who live alone often stop to chat. **(a)** In this way, the street helps people stay connected. **(b)**

Second, young people can bring new ideas. Last year, students from a nearby university opened a pop-up café in an empty shop for one month. **(c)** They also posted photos on social media, which attracted visitors from other towns. **(d)** The café closed when the month ended, but two of the students later opened a permanent bookshop on the same street.

Third, students can help shops reach new customers. I like to buy snacks at the convenience store after school. For example, we could design posters, make short videos or help shop owners start online shops. Many of us use social media every day, so these are skills we can easily share.

[D] In conclusion, the shopping street near my house has many closed shops, and it is sad.

先生のコメント

A：三つの理由を順に述べる構成がわかるように、最初の理由を導く語句を入れましょう。

B：第3段落に、取り組みの効果を示すデータを加えましょう。

C：下線部は段落の主張と関係がありません。差し替えましょう。

D：結論で、主張と三つの理由をまとめ直しましょう。

問 1 Based on Comment A, which is the best expression to put in **[A]**? **14**

① However　② As a result　③ First of all　④ In other words

問 2 Based on Comment B, where is the best place to add the following sentence?
"According to the local shop association, the number of people walking along the street on weekends rose by about 30% during that month." **15**

① (a)　② (b)　③ (c)　④ (d)

問 3 Based on Comment C, which is the best sentence to replace the underlined one? **16**

① Many shop owners are skilled at their work but have little experience with digital tools.
② Convenience stores are open twenty-four hours a day.
③ Some students prefer to study in libraries.
④ The street was built more than sixty years ago.

問 4 Based on Comment D, which is the best way to rewrite the conclusion? **17**

① In conclusion, convenience stores are more useful than shopping streets.

② In conclusion, only university students can save shopping streets.

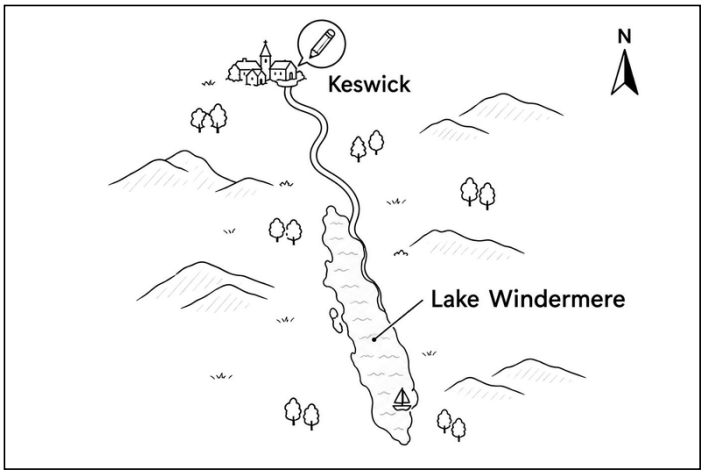

③ In conclusion, people should stop using social media.

④ In conclusion, our shopping street connects people, and students can help it with fresh ideas and new ways to reach customers.

第5問 （配点 16）

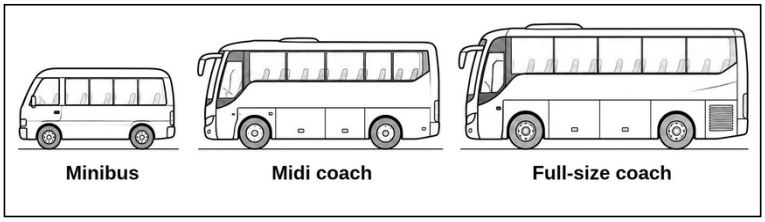

あなたはイギリスの高校で、クラスの日帰り旅行の係をしています。次の資料を読んで、問いに答えなさい。

Lakeland Coaches — Day Trip Hire

Coach size	Seats	Weekday price	Weekend price
Minibus	up to 16	£280	£320
Midi coach	up to 29	£390	£450
Full-size coach	up to 53	£520	£600

• Prices include the driver and fuel for up to 10 hours. Each extra hour: £40.
• A deposit of 20% is required when booking. The deposit is refundable if you cancel at least 14 days before the trip.
• Optional travel insurance: £2 per passenger.
• All our coaches have seat belts, air conditioning and space for luggage. Food and drink may be taken on board, but please take your rubbish with you.

From: Mr. Hughes
To: Trip Committee
Subject: Lake District trip — decisions

Hello everyone,

Thanks for organising the vote. As you know, 20 students have signed up, and Ms. Patel and I will come too. Since most of you chose Saturday, let's go on Saturday 17th May. We'll leave school at 7:30 a.m. and should be back by 6:30 p.m. Please book the smallest coach that fits all of us, and add insurance for everyone, including the teachers. I have checked the timetable of the lake cruises, and if we arrive at Bowness by 10:30, we can catch the 11:00 boat and still have plenty of time for lunch and a short walk by the lake in the afternoon.

The boat trip on Lake Windermere is the main event, but if it rains heavily, the boats won't run. In that case, we'll visit the Pencil Museum in Keswick instead. Its entrance fee is £5 per person, compared with £9 for the boat. Keswick is a short drive north of the lake, and the museum has a café, so we can have lunch there if the weather is bad.

Please remind everyone to bring a packed lunch, a waterproof jacket and comfortable shoes. The weather in the Lake District can change very quickly, even in May. Students who need to take medicine during the day should tell Ms. Patel before the trip. Finally, several of you asked about shopping. If there is time after the cruise, we will stop for 30 minutes at the shops in Bowness on the way back to the coach, but please do not spend all your money on fudge!

Please pay the deposit by Friday. Thanks,
Mr. Hughes

Vote results (20 students)

Question	Option	Votes
Day	Saturday / Sunday	13 / 7
Main activity	Boat trip / Hiking / Shopping	11 / 6 / 3

Comments from the vote: "The boat trip sounds relaxing." / "Can we have some free time for shopping after lunch?" / "I'd prefer hiking, but I'm happy to go on the boat."

Windermere Lake Cruises — Information for Groups

Enjoy a 45-minute cruise across England's largest lake, with views of the surrounding hills. Our boats leave the pier at Bowness every 30 minutes from 10:00 a.m. to 4:30 p.m. Group tickets (15 people or more) cost £9 per person, including teachers. Please arrive at the pier 15 minutes before departure.

Safety first: cruises may be cancelled in heavy rain or strong winds. If your cruise is cancelled, you will receive a full refund, or you may change to another day free of charge. There is a gift shop and a small café at the pier, and life jackets are provided for all passengers on deck.

問 1 Which coach should the committee book, and how much will it cost (not including insurance)? **18**

① A minibus for £320　② A midi coach for £390
③ A midi coach for £450　④ A full-size coach for £600

問 2 How much will the insurance cost in total? **19**

① £40　② £44　③ £58　④ £106

問 3 Will the committee need to pay for extra hours? **20**

① Yes, for one hour, because the trip lasts 11 hours.
② No, because the trip lasts less than 10 hours.
③ Yes, for two hours, because the coach must return to the garage.
④ No, because extra hours are free on weekends.

問 4 Which of the following statements are true? Choose the best combination.

A. More than half of the students voted for the boat trip.

B. The deposit can never be returned.

C. If it rains heavily, the entrance fee per person will be lower.

D. Ms. Patel organised the vote. **21**

① A and B　② A and C　③ B and D　④ C and D

問 5 Which **two** of the following can be inferred from the materials? (The order does not matter.) **22** **23**

① The trip will take place on a Sunday.

② Hiking was the most popular activity.

③ The deposit for the coach will be £90.

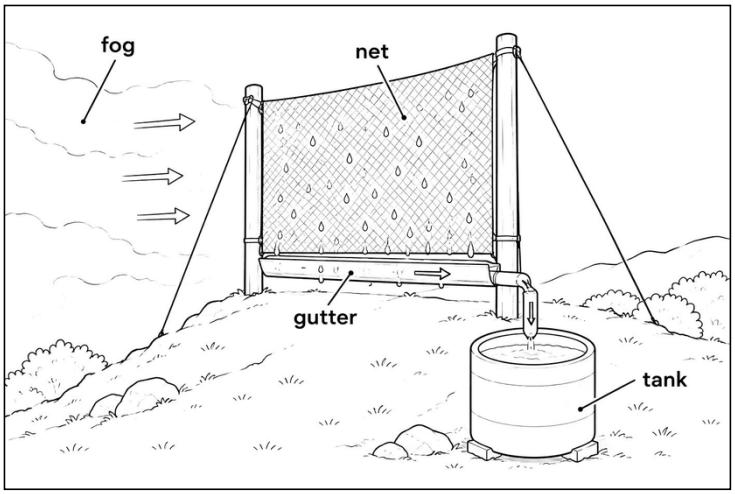

④ Mr. Hughes followed the majority opinion when choosing the day.

⑤ The Pencil Museum is next to Lake Windermere.

第6問 （配点 12）

あなたは英語の授業で、社会に役立つ技術について発表します。次の文章を読み、発表メモを完成させなさい。

Catching Water from the Clouds

Tomás Rivera grew up in a fishing village on the northern coast of Chile, one of the driest places on Earth. It almost never rained there, but most mornings, a thick fog called camanchaca rolled in from the Pacific Ocean. As a boy, Tomás noticed that drops of water collected on spider webs and on his grandmother's washing line. "If a spider can catch water," he once asked his teacher, "why can't we?" His teacher laughed, but she lent him a book about the desert, and Tomás read it so many times that the cover fell off.

Years later, after studying engineering in Santiago, Tomás returned to the north and joined a small project in the hill village of Alto Verde. The village had no river, and drinking water was delivered by truck once a week at a high price. A team of scientists had set up large plastic nets, called fog catchers, on a hillside. In theory, fog would pass through the mesh, tiny droplets would stick to it, and the water would run down into pipes. On paper, a single large net could collect hundreds of litres on a foggy morning. The scientists were excited, and newspapers in Santiago wrote about the "water from the sky."

In practice, the first nets were a failure. Strong winds tore them apart within months, and when they broke, nobody in the village knew how to fix them. Many villagers became skeptical. "Scientists come, take photos and leave," one farmer told Tomás. "Then the nets fall down." Some families even took pieces of the broken nets home to use as fences for their goats. Tomás realised that if the project failed again, it might be many years before anyone in the village trusted outsiders.

Tomás decided that the problem was not only technical. He spent a winter living in the village, listening to people's complaints and watching how the wind moved across the hill. He then tested dozens of materials and found that a double layer of a cheap, flexible mesh collected more water and survived strong winds better. He also tilted the nets slightly so that water ran off faster before it could be blown away. Not every idea worked. One net made of a strong but expensive fabric collected plenty of water, but no one in the village could afford to replace it, so Tomás gave it up. "A perfect net that nobody can repair," he wrote in his diary, "is just a future piece of rubbish."

Most importantly, he designed the system so that it could be repaired with simple tools and materials sold in the nearest town. He trained a group of local women and young people, who formed a committee to look after the nets. The committee met every Sunday after church to check the nets and decide who would repair them. Within three years, the fog catchers at Alto Verde were producing an average of 6,000 litres of water a day — enough for drinking, a small vegetable garden and even a tiny brewery that now sells "fog beer" to tourists.

The water changed more than daily life. Children who had spent hours each week carrying water from the truck stop now had time for homework, and the village school reported better attendance. Several families who had moved to the city returned to Alto Verde to grow vegetables again. Not everyone was pleased at first: the truck driver who had sold water to the village lost a good customer. The committee later hired him to carry spare parts and to drive visitors up the hill.

Today, villages in Peru, Morocco and Nepal use designs based on Tomás's work. When asked about his success, he usually points to the committee. "The nets catch the water," he says, "but the people keep the nets." In 2021, members of the Alto Verde committee travelled to Morocco to train villagers there — the first time most of them had ever left Chile.

発表メモ

Tomás Rivera and fog catchers

■ Childhood inspiration → 問1

■ Events in order → 問2 (four boxes)

■ Improvements Tomás made → 問3 (two answers)

■ Key message → 問4

問 1　What first gave Tomás the idea of catching water? **24**

① A lesson about rain clouds at school

② Water drops on spider webs and a washing line

③ A truck delivering water to his village

④ A visit to a scientist's laboratory

問 2　Put the following events into the order in which they happened.

25 → **26** → **27** → **28**

① Strong winds destroyed the first nets.

② Villages in other countries began using similar designs.

③ Tomás lived in Alto Verde for a winter.

④ Tomás studied engineering in Santiago.

問 3　Choose **two** improvements that Tomás made. (The order does not matter.) **29** **30**

① He used two layers of a flexible mesh.

② He replaced the nets with expensive metal panels.

③ He moved the project to a village with a river.

④ He asked scientists to repair the nets every month.

⑤ He made sure local people could repair the nets themselves.

問 4 Which statement best expresses the key message of the story? **31**

① Fog catchers work best when they are as large as possible.

② Scientists should not work with villagers.

③ Technology alone is enough to solve water shortages.

④ A technology lasts when the local community can understand and maintain it.

第7問 （配点 16）

あなたは心理学についての発表のために、次の記事を読んでポスターを作っています。

The Number That Stays in Your Head

Imagine you are asked two questions. First: "Is the population of Kenya more or less than 90 million?" Second: "What is your best guess of the population of Kenya?" Now imagine a friend is asked the same questions, except the first number is 20 million. Research suggests that your guess will probably be much higher than your friend's — even though both of you know the first number was chosen at random. Neither of you would say that the first question changed your answer, yet it very likely did.

This tendency is called the **anchoring effect**. The first piece of information we receive acts like a ship's anchor: our later judgements may move around it, but they rarely move far away. In one classic study, participants spun a wheel that stopped at either 10 or 65, and were then asked to estimate the percentage of African countries in the United Nations. Those who saw 10 gave an average estimate of 25%; those who saw 65 guessed 45%.

Anchors are everywhere in daily life. A price tag that says "Was £80, now £50" makes £50 feel like a bargain, even if the item was never really worth £80. In salary negotiations, the first figure mentioned — by either side — strongly influences the final agreement. Restaurants sometimes put one extremely expensive dish at the top of the menu, not because they expect to sell many, but because it makes the other dishes look reasonable. Online shops use the same trick when they show a "recommended retail price" next to their own, lower price. Even the order in which we see prices matters: when shoppers look at the most expensive model first, they tend to spend more overall than when they start with the cheapest one.

Anchors do not even need to be related to the question. In another study, people were asked to write down the last two digits of their national ID number and then to say how much they would pay for items such as a bottle of wine or a computer keyboard. People whose numbers were high were willing to pay up to three times more than those whose numbers were low. A completely meaningless number had affected how much they thought the items were worth.

Surprisingly, experts are not immune. In one experiment, experienced estate agents were shown the same house but given different "listing prices." Their own valuations of the house rose and fell with the listing price, yet most insisted that the listing price had not affected their judgement at all. Similar results have been found with judges deciding prison sentences and doctors estimating how long a patient will need to recover. Experience, it seems, does not remove the effect; it may only make people more confident that they are not affected.

Can we protect ourselves? Simply knowing about the effect helps only a little. More effective is to create your own reference point before seeing anyone else's number — for example, by checking the prices of similar items first. Another strategy is called "considering the opposite": deliberately listing reasons why the anchor might be wrong. In experiments, people who did this were influenced much less. Taking time also helps: anchors have their strongest effect when we are tired, busy or in a hurry, so it is wise to avoid making important decisions under time pressure.

Interestingly, anchors can also be used for good. Some charities have found that suggesting a donation amount on their forms — for example, "Most people give £20" — increases the average gift. Teachers who set high but realistic goals at the start of a course may raise what students believe they can achieve. The effect itself is neither good nor bad; what matters is who sets the anchor and why.

The anchoring effect reminds us that our judgements are not made in a vacuum. The numbers we see first quietly shape what seems "normal," "cheap" or "expensive." Being aware of where an anchor comes from is the first step towards making decisions that are truly our own.

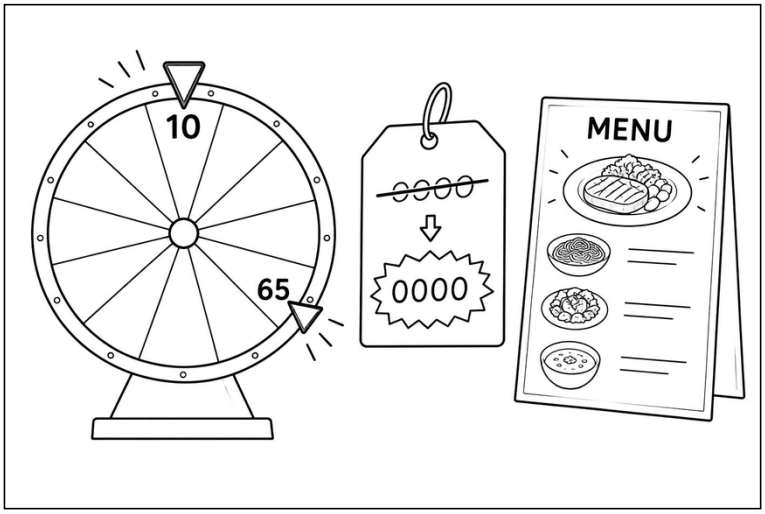

Poster: The Anchoring Effect

Definition: The first number we see (問1).

Wheel experiment: saw 10 → estimate 25% / saw 65 → estimate (問2)

Everyday examples: sale tags, salary talks, expensive menu items

How to reduce it: (問4)

問 1 Which best completes the definition on the poster? **32**

① strongly influences our later judgements
② is usually forgotten very quickly
③ is always the correct answer
④ only affects people who are not experts

問 2 Which number completes the wheel experiment on the poster? **33**

① 10%　② 25%　③ 45%　④ 65%

問 3 Why do some restaurants put a very expensive dish at the top of the menu? **34**

① They expect most customers to order it.
② It is the most popular dish.
③ The law requires them to list it first.
④ It makes the other prices seem more acceptable.

問 4 Which **two** strategies should be written in (問4)? (The order does not matter.) **35** **36**

① Trust the first price you are told.
② Decide on your own reference point before seeing others' numbers.
③ Ask an expert, because experts are not affected.
④ Make your decision as quickly as possible.
⑤ Think of reasons why the first number might be wrong.

問 5 Your friend is about to buy a used bicycle. The seller says, "It cost £600 new, but I'll give it to you for £300." Based on the article, what is the best advice? **37**

① Accept the offer quickly, because £300 is half the original price.

② Check the prices of similar used bicycles first, then decide what a fair price is.

③ Offer £600, because the seller mentioned that number first.

④ Ask the seller to repeat the price several times.

第8問 （配点 17）

あなたは「高校生のアルバイト」についてレポートを書くために、次の資料を集めました。

Source A — Article: "Work and Grades: Is There a Limit?"

A study of 3,200 high school students looked at the relationship between hours of part-time work and school grades. Students who worked up to about 10 hours a week had grades similar to, or slightly better than, those who did not work at all. Researchers suggest that a small amount of work may encourage better time management. However, grades fell noticeably among students working more than 15 hours a week, and these students also reported sleeping less. The researchers warn that the study shows a correlation, not necessarily a cause: students who were already struggling at school might choose to work more. The study also found that the type of job mattered. Students whose employers gave them fixed weekly schedules reported less stress than those whose shifts changed at short notice, even when the total number of hours was the same.

In several countries, the law already limits how much teenagers can work. In the UK, for example, 16-year-olds who are still at school may not usually work more than 12 hours in a school week, and in parts of the United States, students under 16 cannot work after 7 p.m. on school nights. Supporters of these rules say they protect students' health and study time. Critics argue that they make it harder for teenagers from low-income families to earn money they really need. In a separate survey of 1,000 working students, the most common reasons for having a job were "to have my own spending money" (58%), "to save for the future" (21%) and "to help my family" (12%).

Hours of work per week	0	1–5	6–10	11–15	16–20	21+
Average grade (out of 5)	3.4	3.5	3.5	3.2	2.9	2.6
Average sleep (hours/night)	7.1	7.0	6.9	6.5	6.1	5.8

Source B — Opinions

We asked five people for their views on high school students and part-time jobs.

Haruka (student, 17): My job at a bakery taught me how to talk to customers and how hard it is to earn money. I used to buy things without thinking. Now I save first. I work two afternoons a week, and I still have time for my homework and my club.

Daniel (student, 18): I worked about 20 hours a week at a restaurant last year because I wanted to buy a motorbike. I got the bike, but my grades dropped and I was always tired in class. This year I work only on Saturdays, and I feel much better.

Mr. Grant (parent): I support my son working, but I set a rule: no more than two evenings a week, and never during exam periods. At first he complained, but after his first set of exams he admitted that the rule had helped him. He has also learned to plan his week on a calendar, which I never managed to teach him.

Mr. Sato (homeroom teacher): Some of my students work to help their families, so a total ban would be unfair. What worries me is when students take on extra shifts just before exams because the shop is short of staff.

Emi (university student, 20): In high school, I didn't work at all because my parents wanted me to focus on entrance exams. When I started university, I had never had a job interview and didn't know how to speak politely to customers. My first month at a café was really hard. Looking back, a few hours of work a week in high school would have prepared me much better.

Ms. Kwon (shop manager): Teenage staff are often very reliable. But I've seen students so tired that they fall asleep during breaks. Schools and employers should talk to each other more. At our shop, we now ask young staff for their exam dates at the start of each term, and we try not to give them shifts that week.

レポートの構成メモ

Title: Part-Time Jobs: Yes, but Within Limits

Step 1 — Introduction: Many students work. My position: {問1}

Step 2 — Body: Benefits → {問2 (two answers)}　Data → {問3}　A caution about the data → {問4}

Step 3 — Conclusion and proposal: {問5}

問 1　Which position best matches the title of the report? **38**

① High school students should not work at all.
② Students should work as many hours as they want.
③ Only students with good grades should work.
④ Part-time work is acceptable if the number of hours is limited.

問 2　Choose **two** benefits of part-time work that are supported by the sources. (The order does not matter.) **39** **40**

① Learning to manage money more carefully
② Getting more sleep
③ Developing communication skills with customers
④ Always getting better grades
⑤ Spending less time with family

問 3　Complete the sentence using the table.
Grades start to fall when students work **41** hours a week, and average sleep first drops below six hours at **42** hours a week.

① 0　② 1–5　③ 6–10
④ 11–15　⑤ 16–20　⑥ 21+

問 4　Which is the most appropriate "caution about the data"? **43**

① Working long hours may not be the cause of low grades; struggling students might choose to work more.
② The study included too few students to be useful.
③ The table proves that work improves grades.
④ Sleep has no relationship with grades.

問 5　Which is the most appropriate proposal for the conclusion? **44**

① Schools should ban part-time jobs during the whole school year.
② Employers should hire only university students.
③ Schools could allow work of up to about 10 hours a week, with breaks during exams and better communication with employers.
④ Students should work more hours to save money for university.

解答用紙（マークシートの代わり）

選んだ番号を○で囲む。採点後、間違えた番号に印をつけ、解説で根拠の位置を確かめる。

解答番号	①	②	③	④	⑤	⑥	⑦	⑧	⑨
1	①	②	③	④	⑤	⑥	⑦	⑧	⑨
2	①	②	③	④	⑤	⑥	⑦	⑧	⑨

	問5	44	③	4	
合計		**44**		**100**	

得点の目安

80点以上：難関国公立の合格圏／65点：中堅国公立・共テ利用の標準／50点：平均点前後。第5問以降で崩れる人は「設問を先に読み、探す情報を決めてから本文へ」を徹底する。

解説

第1問 掲示・お知らせ（情報の読み取り）

本文の要旨
留学先の高校の掲示板にある「国際料理の夕べ」の案内。各国の料理を持ち寄るイベントで、参加者は前日までに料理名と材料を登録する。アレルギー表示のためナッツ・卵・乳製品の使用を明記すること。会場は食堂、ボランティアは4時集合。

問 1 解答番号 1 **正解 ④** （2点）

”register the name of your dish and its main ingredients … by Thursday”が根拠。
① 電子レンジは使えない。② 飲み物と皿は生徒会が用意。③ 4時集合はボランティアだけ。

問 2 解答番号 2 **正解 ①** （2点）

”To help guests with allergies, write on your label …” → アレルギーのある人のため。

問 3 解答番号 3 **正解 ③** （2点）

”Best Story Behind a Dish”は料理にまつわる話を評価する。② ④ はそもそも掲示にない賞。

語句 potluck 持ち寄りの食事会 ／ ingredient 材料 ／ label 表示する ／ cafeteria 食堂

第2問 レビュー記事（事実と意見）

本文の要旨
イギリスの学生向けウェブマガジンが、3種類の単語学習アプリ（WordNest・Flashly・LexiQuest）を比べた記事と読者コメント。料金・機能・30日間の試用で覚えた語数の表と、編集部の評価。

問 1 解答番号 4 **正解 ③** （3点）

LexiQuest は月 £4.99 で最も高い。

問 2 解答番号 5 **正解 ④** （3点）

”In our view … the smartest choice”は編集部の評価。”In our view / I think”などの合図に注目。
①②③ は記事・表から確認できる事実。

問 3 解答番号 6 **正解 ①** （3点）

”rushed through levels just to climb the leaderboard”（順位を上げるためだけに急いだ）→ ①。

問 4 解答番号 7 **正解 ②** （3点）

”A gimmick that keeps you studying beats a perfect method you abandon.”の言いかえが ②。③ は Olivia の意見。

語句 subscription 定額料金 ／ spaced repetition 間隔反復 ／ leaderboard 順位表 ／ gimmick 小細工

第3問 体験談（出来事の順序・心情）

本文の要旨
ニュージーランドに留学した日本人学生 Sota が、地元のラグビーチームのマネージャーを務めた体験談。言葉の壁で最初は孤立したが、選手の水筒に名前を書いたことをきっかけに会話が生まれ、最後の試合では仲間から「チームの一員」と呼ばれる。

問 1 解答番号 8 **正解 ④** （3点）

”The players spoke so fast, with so many jokes I didn’t understand”が直接の理由。

問 2 解答番号 9・10・11・12 **正解 ②→⑤→④→①** （3点・完答）

水筒の渡し間違い（第2段落）→ 名前を書く（第3段落）→ 「コーチ・ソウタ」と呼ばれる（第4段落）→ 試合球を受け取る（第5段落）。
③ は逆：ラグビーの言葉を教わったのはソウタ。

問 3 解答番号 13 **正解 ②** （3点）

ペンは「水筒に名前を書いた」きっかけの象徴で、使い切りかけている＝何度も書いて交流が続いた。試合球（チームの一員）と並べて飾っていることもヒント。

語句 bench ベンチ ／ kit（英・NZ）用具一式 ／ nickname あだ名 ／ awkward 気まずい

第4問 推敲（下書きとコメント）

本文の要旨
高校生 Rina の意見文「地元の商店街を守るために」の下書き。主張は「商店街は地域のつながりの場であり、高校生も関われる」。先生のコメントに従って、論点の順序を示す語・データの挿入位置・不要な文の削除と差し替え・結論の書き直しを考える。

問 1 解答番号 14 **正解 ③** （3点）

後に Second, Third と続くので、最初の理由を導く First of all。

問 2 解答番号 15 **正解 ③** （3点）

”that month”はポップアップカフェを開いた「1か月」を指す → カフェの紹介の直後（c）。
（d）だと SNS の話の後になり、”that month”が何を指すか遠くなる。(a)(b) は第2段落（つながりの話）で無関係。

問 3 解答番号 16 **正解 ①** （3点）

段落の主張は「生徒が店の新しい客層開拓を手伝える」。直後の具体例（ポスター・動画・オンライン店）につながるのは、店主がデジタルに不慣れだという ①。

問 4 解答番号 17 **正解 ④** （3点）

三つの理由（つながり・新しいアイデア・客層開拓）と主張をまとめた ④。②は「高校生も役割を果たせる」という主張に反する。

語句 shopping street 商店街 ／ vacant 空いている ／ foot traffic 人通り ／ pop-up shop 期間限定の店

第5問 旅程・料金表・メール（複数資料の照合）

本文の要旨
イギリスの湖水地方へのクラス旅行の計画。バス会社の料金表（人数・平日/週末・保険）、先生からのメール、生徒の投票結果。
人数が22人なので中型バス、土曜出発で週末料金、ボート体験は雨天時に鉛筆博物館へ変更、などの条件を組み合わせて読む。

問 1 解答番号 18 **正解 ③** （3点）

生徒20人＋先生2人＝22人 → 16席の minibus では足りず、29席の **midi coach**。土曜日＝**週末料金 £450**。
② は平日料金。人数の合計（先生を含める）と曜日の両方を照合する問題。

問 2 解答番号 19 **正解 ②** （3点）

”add insurance for everyone, including the teachers” → 22人 × £2 ＝ **£44**。① は生徒だけ（20人）で計算した誤り。

問 3 解答番号 20 **正解 ①** （3点）

7:30 出発 → 18:30 帰着 ＝ **11時間**。10時間を1時間超える → £40 追加。

問 4 解答番号 21 **正解 ②** （3点）

A：20人中11人（55%）→ 正。C：雨天は博物館 £5（ボート £9 より安い）→ 正。
B：14日前までの取り消しなら返金される → 誤。D：投票を行ったのは委員会（"Thanks for organising the vote"）→ 誤。

問 5 解答番号 22・23 **正解 ③・④（順不同）** （4点・順不同・完答）

③ £450 の 20% ＝ **£90**。④ 投票で土曜が13票と多数 → "Since most of you chose Saturday"。
① 土曜。② 最多はボート（11票）。⑤ 博物館は Keswick にあり、湖の隣とは書かれていない。

語句 coach（英）長距離バス ／ surcharge 追加料金 ／ deposit 前金 ／ refundable 払い戻し可能な ／ itinerary 旅程

第6問 伝記的な文章＋発表メモ（時系列・要点）

本文の要旨
架空の発明家「Tomás Rivera」の物語。チリの漁村に育ち、霧から水を集める「フォグ・キャッチャー」を改良して乾燥地域の村に水を届けた。最初の網は風で破れ、村人にも疑われたが、網の素材と角度を変え、村人自身が修理できる設計にしたことで広まった。
※設問の題材としての架空の人物です（霧から水を集める技術自体は実在します）。

問 1 解答番号 24 **正解 ②** （3点）

第1段落：クモの巣や祖母の洗濯ロープにしずくがつくのに気づいた。

問 2 解答番号 25・26・27・28 **正解 ④→①→③→②** （3点・完答）

サンティアゴで工学を学ぶ（第2段落）→ 最初の網が風で壊れる（第3段落）→ 村で冬を過ごす（第4段落）→ 他国に広まる（第6段落）。

問 3 解答番号 29・30 **正解 ①・⑤（順不同）** （3点・順不同・完答）

① "a double layer of a cheap, flexible mesh"。⑤ 近くの町で買える材料と簡単な道具で直せる設計＋住民の委員会。
② 安い素材を使った。④ 逆に「科学者が去ると誰も直せない」が問題だった。

問 4 解答番号 31 **正解 ④** （3点）

"The nets catch the water, but the people keep the nets." → 地域の人が維持できてこそ技術が続く。③は逆。

語句 mesh 網 ／ droplet しずく ／ arid 乾燥した ／ skeptical 疑い深い ／ maintain 維持する

第7問 説明文＋図（要点・図の完成・応用）

本文の要旨
「アンカリング効果」の説明文。最初に見た数字（アンカー）がその後の判断を引っぱる。値札の「元値」表示、交渉の最初の提示額、推測問題の実験などの例。専門家でも影響を受けるが、別の基準を自分で考える・反対の理由を挙げると影響を弱められる。

問 1 解答番号 32 **正解 ①** （3点）

"our later judgements may move around it, but they rarely move far away" → ①。④ は第4段落（専門家も影響を受ける）と逆。

問 2 解答番号 33 **正解 ③** （3点）

”those who saw 65 guessed 45%”。④ 65 はルーレットの数字そのもので、推測値ではない。

問 3 解答番号 34 **正解 ④** （3点）

”not because they expect to sell many, but because it makes the other dishes look reasonable” → ④。
① は明確に否定されている。

問 4 解答番号 35・36 **正解 ②・⑤（順不同）** （4点・順不同・完答）

② ”create your own reference point before seeing anyone else’s number”。⑤ ”considering the opposite”。
③ 専門家も影響を受ける（第4段落）。「知っているだけ」ではあまり効かない点も押さえる。

問 5 解答番号 37 **正解 ②** （3点）

「新品600ポンド」はアンカー。第5段落の対策（似た商品の価格を先に調べて自分の基準を作る）を当てはめた ②。① はアンカーに引きずられた判断そのもの。

語句 anchor いかり・基準点 ／ estimate 見積もる ／ negotiate 交渉する ／ bias 偏り ／ counteract 打ち消す

第8問 複数の資料＋論説文の構成（統合・要約）

本文の要旨
テーマ「高校生のアルバイトは認めるべきか」。記事（労働時間と成績の関係）、表（アルバイトの週あたり時間と平均成績）、生徒・保護者・店長の意見。
週10時間以内なら成績への悪影響はほとんどなく、社会経験・金銭感覚の利点がある。長時間になると睡眠と成績に悪影響。
生徒のレポートの構成メモ（3ステップ）を完成させる。

問 1 解答番号 38 **正解 ④** （3点）

題名 ”Yes, but Within Limits” → ④。

問 2 解答番号 39・40 **正解 ①・③（順不同）** （4点・順不同・完答）

① Haruka「以前は考えずに買っていた。今はまず貯金」。③ Haruka「お客さんとの話し方を学んだ」。
② 表では働く時間が長いほど睡眠は減る。④ ”always” は言い過ぎ：長時間だと成績は下がる。

問 3 解答番号 41・42 **正解 ④・⑥（完答）** （3点・完答）

{1}：成績は 0〜10時間で 3.4〜3.5、**11-15時間**で 3.2 に下がり始める → ④。
{2}：睡眠は 16-20時間で 6.1（まだ6時間以上）、**21時間以上**で 5.8 → ⑥。
「下回る（below）」は境界の数字に注意。6.1 を「約6時間」と丸めて ⑤ を選ばない。

問 4 解答番号 43 **正解 ①** （3点）

記事の最後 ”a correlation, not necessarily a cause” を言いかえた ①。② 3,200人で少なくない。③ ”proves” は言い過ぎ。

問 5 解答番号 44 **正解 ③** （4点）

データ（10時間以内は悪影響が小さい）・Mr. Grant（試験期間は休む）・Ms. Kwon（学校と雇用者の連携）をすべて取り込んだ ③。
① 立場（認める）と逆。④ データと逆。

語句 part-time job アルバイト ／ correlation 相関 ／ time management 時間管理 ／ cap 上限を設ける ／ permission 許可
