大学入学共通テスト 予想問題（2025年度～ 新課程の形式） 第4回

外 国 語
〔英語（リーディング）〕

試験時間 80分	配点 100点	解答数 44	英文の量 約5,130語

テーマ：ホームステイ・大学の食堂・地域行事・図書館・語学留学・天然染料・ヒートアイランド・自転車の町
80分・100点・大問8・解答数44 オリジナル問題（本文・設問・解説すべて書き下ろし）

注 意 事 項

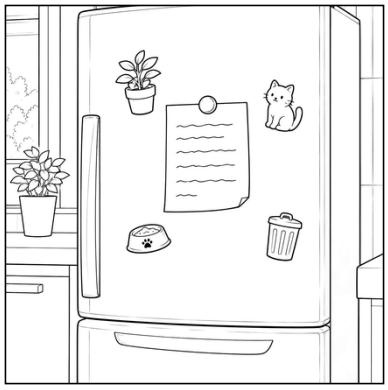

1 **本番と同じ順で80分で解く**。時間配分の目安：第1～3問 15分／第4問 10分／第5問 13分／第6問 13分／第7問 13分／第8問 14分（見直し2分）。
2 答えは「解答用紙」の番号に○。終わったら「正解と配点」で採点し、「解説」で根拠の場所を確認する。
3 本番の傾向（情報の検索・事実と意見の区別・推敲・複数資料の統合・要約・論理展開）をすべての大問で再現しています。
4 各大問の解説の最初に**本文の要旨（日本語）**があります。読み終えた後の内容確認に使えます。

第1問	案内・メモ（情報の読み取り）
第2問	調査結果とコメント（事実と意見）
第3問	物語（出来事の順序・語句の意味）
第4問	推敲（下書きとコメント）
第5問	講座案内・時間割・メール（複数資料の照合）
第6問	物語文＋発表メモ（時系列・人物の変化）
第7問	論理的な文章＋スライド（要点・応用）
第8問	複数の資料＋論説文の構成（統合・要約）

第1問 （配点 6）

あなたはカナダでホームステイをしています。ホストマザーの Karen が冷蔵庫にメモを貼っていきました。

Riku — Weekend To-Do List

Hi Riku! Thanks so much for looking after things while we're at Grandma's (Friday night to Sunday evening). I've written everything down so you don't have to remember it all.

Plants: Water the kitchen plants on Saturday and Sunday — just one glass each. The balcony plants only need water on Saturday — it's supposed to rain on Sunday.
Biscuit (the cat): Food twice a day, morning and evening. Put her tablet in the **morning** food only. Don't let her out! She will sit by the back door and cry, but she isn't allowed outside until the vet says her leg is better.
Rubbish: Take the green bin out to the street on Sunday morning before 8.
Problems? Mr. Lee next door has a spare key. His number is on the board by the door. He's usually at home in the evenings.

There's pizza in the freezer for Saturday, and there's money in the blue envelope if you want to order something on Sunday. See you on Sunday! — Karen

問 1 What should Riku do on Sunday? **1**

① Water the balcony plants
② Take out the green bin
③ Give Biscuit her tablet in the evening
④ Visit his grandmother

問 2 Why doesn't Riku need to water the balcony plants on Sunday? **2**

① Mr. Lee will water them.
② They have already died.
③ Karen will water them when she returns.
④ Rain is expected that day.

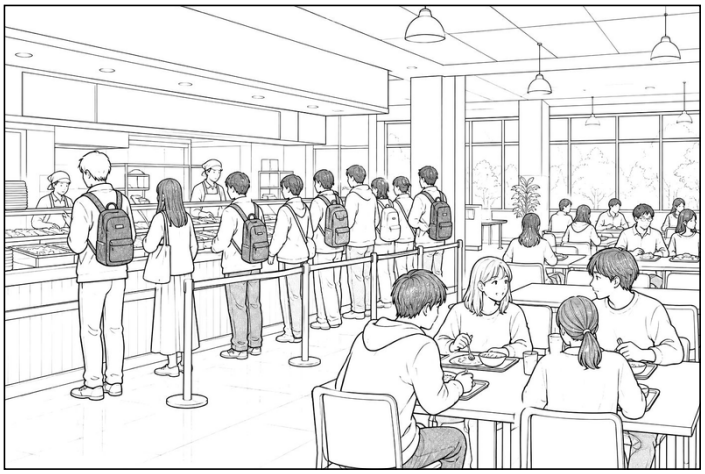

問 3 If Riku gets locked out of the house, he should **3**

① contact the neighbour.
② call Karen's grandmother.
③ wait for the family to return on Saturday.
④ let the cat out.

第2問 （配点 12）

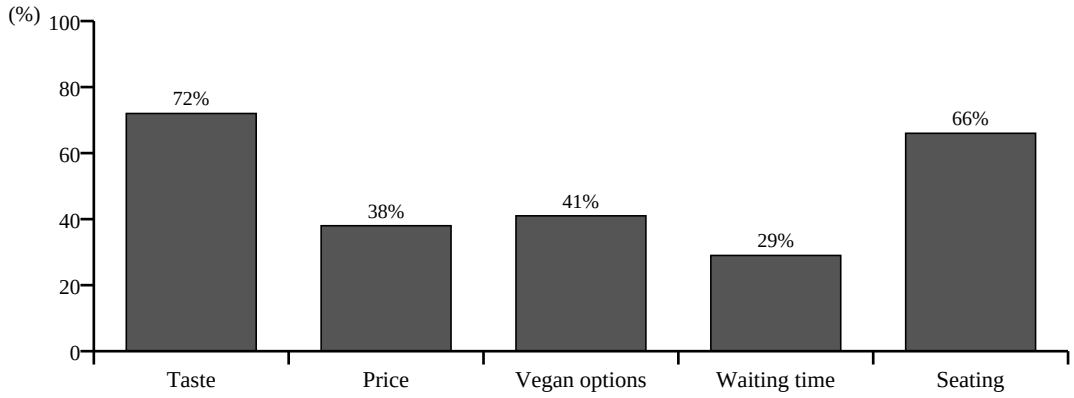

あなたはイギリスの大学の短期講座に参加しています。大学新聞で次の記事を読みました。

Refectory Survey: What Do Students Really Think?

Last month, the Student Union asked 500 students to rate the campus refectory. A total of 412 students replied. The graph shows the percentage who said they were "satisfied" or "very satisfied" with each area.

Satisfaction with the refectory (%)

The refectory manager said that a second serving counter will open in January to reduce queues at lunchtime. A new vegan menu will also be introduced next term. She added that prices would stay the same this year, because the cost of ingredients has risen sharply.

The Student Union also asked what students would most like to change. The top three answers were "shorter queues" (44%), "cheaper meal deals" (31%) and "more plant-based dishes" (15%). About a quarter of the students surveyed said they bring their own lunch at least three days a week.

Compared with last year's survey, satisfaction with taste rose by 6 points, while satisfaction with waiting time fell by 11 points. The Student Union believes this is because the number of students on campus has grown by about 15% without any increase in the size of the refectory.

Student comments

Fatima: The curry is honestly the best I've had in this country. But £6.50 for lunch every day really adds up. Most days I bring sandwiches and treat myself to the curry on Fridays.

Josh: I waited 25 minutes yesterday and had only ten minutes to eat before my seminar. The food is fine; the queue is the problem.

Daniel: I like the big windows and the comfortable chairs. It's my favourite place to meet friends between lectures, even when I don't buy anything.

Elena: As a vegan, I usually end up with chips and salad. I'm glad they're finally listening. Last year, several of us wrote to the manager about it.

問 1 Which area were students the **least** satisfied with? **4**

① Taste　② Price　③ Vegan options　④ Waiting time

問 2 Which of the following is an **opinion** rather than a fact? **5**

① The curry is the best Fatima has had in the country.
② Josh waited 25 minutes.
③ Lunch costs £6.50.
④ A second counter will open in January.

問 3 Which change is planned to deal with the problem Josh described? **6**

① A new vegan menu　② Lower prices
③ A second serving counter　④ More seats

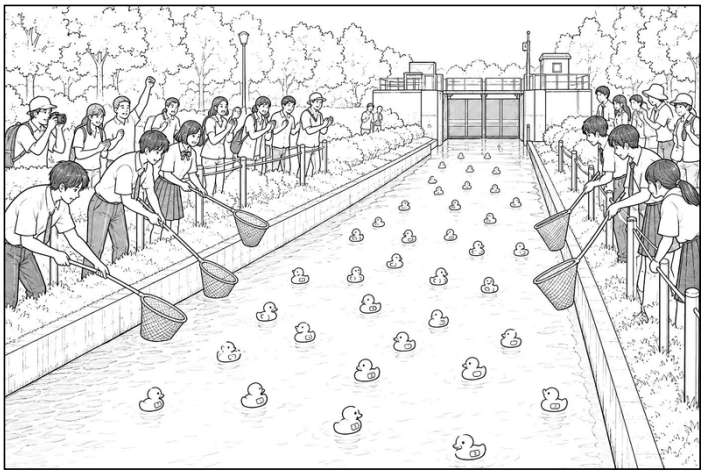

問 4 What does Elena mean by "I'm glad they're finally listening"? **7**

① The staff have started to play music.
② She is pleased that a vegan menu is coming.
③ She thinks the survey was too long.
④ She wants to work in the refectory.

第3問 （配点 9）

あなたは英語の授業で、地域行事についての短い物語を読んでいます。

The Great Duck Race

Every September, the town of Millbrook holds a charity duck race. People buy numbered rubber ducks for two pounds each, and the ducks are dropped into the river from the old stone bridge. The first duck to float under the finish line wins a bicycle. This year, fourteen-year-old Hina had volunteered to help her uncle, who organised the event. For weeks, she had helped him write numbers on the ducks and sell tickets outside the supermarket.

On the night before the race, it rained so heavily that Hina could hear the water roaring from her bedroom. In the morning, the river was brown and **swollen**, rushing much faster than usual and carrying branches. Her uncle stood on the bridge, shaking his head. "If we drop the ducks in there, half of them will end up in the sea," he said. "We might have to cancel." A few families had already arrived with folding chairs and picnic baskets, and some children were waving small flags.

Hina thought about the 3,000 ducks already sold and the children who had been waiting all week. Then she remembered the canal that ran beside the park, where she sometimes fed swans. It was narrow, calm and only a few hundred metres long, with paths on both sides where people could stand and watch. "What about the canal?" she asked. "The water there barely moves, but there's a lock at the end. If they open it a little, there'll be a gentle current."

Her uncle looked at her for a moment and then smiled for the first time that morning. He phoned the canal office, and by ten o'clock, the plan was ready. The lock keeper agreed to open the gate just enough to create a slow, steady current, and he promised to close it immediately if anything went wrong. Volunteers moved the finish line, and Hina's classmates stood along the banks with fishing nets to catch any ducks that drifted to the side. The race started an hour late, but the crowd cheered just as loudly as in any other year. Because the canal was so narrow, people could stand right next to the water, and many said it was the most exciting race they had ever seen.

The winning duck, number 1,207, belonged to an elderly man who said he had bought a duck every year for thirty years and never won anything. The race raised £6,000, which was given to a group that cleans litter from the river. Not a single duck was lost, and the volunteers with nets later joked that they had caught more leaves than ducks. At the end of the day, Hina's uncle handed her a rubber duck with a gold ribbon. "For the best idea of the year," he said. Hina put it on her desk, where it still sits today. Next year, the committee has decided to hold the race on the canal again, whatever the weather.

問 1 Why did Hina's uncle think the race might have to be cancelled? **8**

① The river was flowing too fast after heavy rain.
② Not enough ducks had been sold.
③ The stone bridge was damaged.
④ The canal office refused to help.

問 2 Put the following events into the order in which they happened.
9 → **10** → **11** → **12**

① Hina's classmates stood along the canal with nets.
② Hina suggested using the canal.
③ An elderly man won the bicycle.
④ Heavy rain fell during the night.
⑤ The ducks were dropped from the stone bridge.

問 3 In the second paragraph, the word **swollen** is closest in meaning to **13**

① frozen.
② very clean.
③ higher and fuller than usual.
④ completely dry.

第4問 （配点 12）

あなたは英語の授業で意見文を書いています。次は Mao の下書きと先生のコメントです。

Our Library Should Open Longer

At our school, the library closes at 4:30 p.m., just thirty minutes after classes end. I believe it should stay open until 7:00 p.m. on weekdays. In this essay, I will explain why and answer a possible objection.

First, many students have no quiet place to study at home. Some share a room with younger brothers and sisters, and others live in small apartments. **[A]** the library is the only place where they can concentrate. Cafés and fast-food restaurants are noisy, and buying a drink every day is expensive for students.

Second, the library has resources that are not available elsewhere. **(a)** Students can use reference books, newspapers and computers for free. **(b)** For students preparing for university entrance exams, these resources are especially valuable, as some of the books are too expensive for students to buy themselves. **(c)** Many of them also want to study with friends and ask each other questions. **(d)**

Some people may say that keeping the library open would cost too much because staff would have to work longer. This is a fair point, as the school budget is limited. I usually borrow mystery novels from the library. Parent volunteers or university students could take turns supervising in the evening. Several parents have already said they would be happy to help once a week.

Other schools have already tried this. A high school in the next city extended its library hours last year, and its librarian reported that the number of evening visitors grew every month. Students there say the library has become a place not only for studying but also for helping each other.

[D] In conclusion, the library closes at 4:30, and I think that is too early.

先生のコメント

A：前の文とのつながりを示す語句を入れましょう。

B：第3段落に、自分の学校の具体的なデータを加えましょう。

C：下線部は反論への応答になっていません。差し替えましょう。

D：結論で、主張・理由・反論への答えをまとめましょう。

問 1 Based on Comment A, which is the best expression to put in **[A]**? **14**

① In contrast,　② For these students,

③ Nevertheless,　④ In the past,

問 2 Based on Comment B, where is the best place to add the following sentence?

"In a survey at our school, 64% of third-year students said they would use the library after 4:30 if it were open." **15**

① (a)　② (b)　③ (c)　④ (d)

問 3 Based on Comment C, which is the best sentence to replace the underlined one? **16**

① The library has more than 20,000 books.

② Some students prefer to study at cafés.

③ Libraries in other countries are open on Sundays.

④ However, the extra cost could be kept low.

問 4 Based on Comment D, which is the best way to rewrite the conclusion? **17**

① In conclusion, opening the library until 7:00 would give students a quiet place and useful resources, and volunteers could help keep costs down.

② In conclusion, students should study only at home.

③ In conclusion, the library should sell mystery novels.

④ In conclusion, staff should work longer for no pay.

第5問 （配点 16）

あなたはイギリスの語学学校の夏期講座に申し込みました。次の資料を読みなさい。

Oxbridge Language School — Summer Course (2 weeks)

Mornings (9:00–12:30): General English for everyone, in classes of up to 12 students.
Afternoons (14:00–16:00): Choose ONE elective. Places in each elective are limited to 15 students and are given in the order that applications are received.

Elective	Days	Notes
A: Drama	Mon / Wed / Fri	Performance on the last Friday
B: Football	Mon–Thu	Bring trainers
C: Cooking	Tue / Thu	£20 extra for ingredients
D: Film Club	Mon / Wed	Films in English with subtitles

Course fee: £900 (includes lessons, one elective, a welcome dinner and all teaching materials)
Accommodation: Standard room £250 per week / En-suite room £320 per week
Weekend excursions: London (Sat, £45) / Cambridge (Sun, £35)
Getting here: Free pick-up from Oxford railway station between 12:00 and 16:00 on the Sunday before the course.

Our school has welcomed students from over 40 countries since 1998. All teachers are qualified and experienced, and at the end of the course, every student receives a certificate showing their level. Students must be aged 15 to 18.

Application (summary)

Name	Ken Ota	Age	16
Elective 1st	C: Cooking	Elective 2nd	A: Drama
Room	En-suite	Excursions	London, Cambridge

From: Admissions Office
To: Ken Ota
Subject: Your summer course

Dear Ken,

Thank you for your application. Unfortunately, the Cooking class is already full. We have put you on the waiting list and placed you in your second choice for now. Cooking is our most popular elective, and this year it was full within a week. We are also sorry to say that all en-suite rooms have been booked, so you will stay in a standard room. The difference in price will, of course, be taken off your bill. Standard rooms are shared by two students of the same age and have a washbasin; showers are on each floor.

Your excursion bookings have been confirmed. Please arrive by 4 p.m. on the Sunday before the course starts. There will be a welcome dinner at 6 p.m. and a short level test on Monday morning so that we can put you in the right class. If a place becomes available in the Cooking class, we will let you know by email. Please note that the Drama group will need extra rehearsal time in the second week, so you may have to stay until 16:30 on some days.

Kind regards,
Admissions Office

From our blog: "My Two Weeks at Oxbridge" by Sofia (17, Italy)

I was nervous before I arrived, but on the first evening, everyone sat together at the welcome dinner, and by Monday I had friends from Brazil, Korea and Turkey. The morning lessons were hard work — we had to speak English all the time — but the teachers were patient and funny.

I chose Drama, and it was the best part of the course. We wrote our own short play about a lost suitcase and performed it in front of the whole school on the last Friday. The London trip was exhausting but amazing. We saw Big Ben, walked along the river and had two hours of free time near Covent Garden. Living with a roommate from Japan also helped me, because we could only talk to each other in English. My only advice: bring an umbrella and some warm clothes, because even in July, English weather can surprise you!

問 1 Which elective will Ken take, at least at first? **18**

① Drama　② Football　③ Cooking　④ Film Club

問 2 Complete the sentence.
Ken will pay **19** per week for his room, and his two excursions will cost **20** in total.

① £35　② £250　③ £320
④ £45　⑤ £70　⑥ £80

問 3 On which days will Ken have his elective in the afternoon? **21**

① Tuesday and Thursday　② Monday to Thursday
③ Monday and Wednesday　④ Monday, Wednesday and Friday

問 4 Which of the following statements are true? Choose the best combination.

A. Ken may be able to join the Cooking class later.
B. Ken will stay in an en-suite room.
C. Ken will perform on the last Friday if he stays in Drama.
D. Ken has to arrive on the Monday the course starts. **22**

① A and B　② A and C　③ B and D　④ C and D

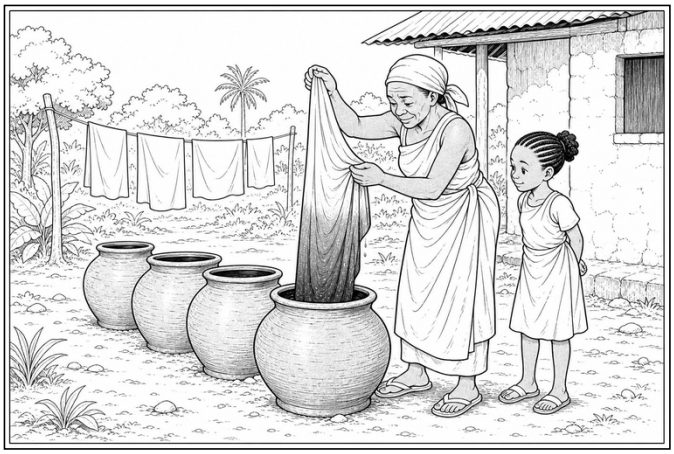

問 5 Which **two** can be inferred from the materials? (The order does not matter.) **23** **24**

① Ken will have English lessons only in the afternoons.
② Ken will pay £20 extra for ingredients.
③ Ken's bill will be lower than he expected for accommodation.
④ Ken will study in a class of more than 20 students.
⑤ Ken will go on trips on both Saturday and Sunday.

第6問 （配点 12）

あなたは英語の授業で、起業家についての文章を読み、発表メモを作っています。

Colours That Last

Lena Okafor grew up in Manchester, but every summer she visited her grandmother in a small town in south-west Nigeria. Her grandmother dyed cloth a deep indigo blue in large clay pots behind her house. Lena loved watching the white cloth turn green in the air and then slowly become blue. "The colour is alive," her grandmother told her. "You have to feed it." Lena did not understand what she meant, but she remembered the words for years.

At university, Lena studied chemistry. She learned that most clothes today are coloured with synthetic dyes, and that the factories which produce them often release polluted water into rivers. She remembered her grandmother's pots and wondered whether natural dyes could be used on a larger scale. Her professors were doubtful. Natural dyes, they told her, were slow to produce, difficult to control and impossible to sell at a fair price.

The problem was not only about rivers. The fashion industry produces huge amounts of clothing, and many items are worn only a few times before being thrown away. Lena believed that if clothes were made more carefully, with colours that lasted, people might keep them longer. A scarf that stayed beautiful for years, she thought, would be worth more than five that faded in a month.

After graduating, Lena borrowed money from her parents and started a small company selling scarves dyed with plants. The first few months were a disaster. Customers loved the colours, but after two or three washes, the scarves began to fade. Within half a year, more than a third of buyers had asked for refunds. Lena almost gave up. She spent her savings on refunds and lay awake at night wondering whether her professors had been right.

Instead, she flew to Nigeria and spent a month working beside her grandmother. She wrote down every step: the wood ash added to the water, the days the mixture was left to ferment, the number of times the cloth was dipped and dried. Her grandmother laughed when she saw the notebook. "I never needed to write it down," she said. "My hands remember." Back in her laboratory, Lena discovered why her grandmother's cloth never faded. The ash made the water alkaline, and the fermentation allowed the dye to bond firmly with the fibres. Her own factory method had skipped both steps to save time. What her grandmother had called "feeding" the colour was, in scientific terms, keeping the bacteria in the dye pot alive and active.

Lena rebuilt the process around what she had learned. It took longer and cost more, but the new scarves kept their colour after fifty washes. She began employing women from her neighbourhood, many of whom had struggled to find work, and trained them in the dyeing process. Today, her company employs thirty people and sells to shops in twelve countries. The dyeing room is filled with large pots like her grandmother's, and every new worker learns to watch the cloth change colour in the air before being allowed to dye anything on their own. The water used in the process is cleaned with plants in a small pond behind the building before it is returned to the river.

Lena's success has not been without criticism. Some people point out that her scarves cost three times as much as ordinary ones, so only wealthier customers can buy them. Lena accepts this. "We are not trying to replace every factory," she says. "We want to show that there is another way, and to make it cheaper step by step." Her company now shares its methods freely with other small dyers, and last year it opened a training centre in her grandmother's town.

In interviews, Lena is often asked about her chemistry degree. She always answers in the same way: "My degree explained the colour. My grandmother knew how to make it. I needed both." Her grandmother, now in her nineties, still dyes a little cloth every summer, and Lena still flies to Nigeria to help her.

発表メモ

Lena Okafor and natural dyes

・Events in order → 問1 (four boxes)

・Why her first scarves failed → 問2

・What she learned in Nigeria → 問3 (two answers)

・Her message → 問4

問 1　Put the following events into the order in which they happened.

25 → **26** → **27** → **28**

① Lena started a company selling scarves.

② Lena began hiring women from her neighbourhood.

③ Lena studied chemistry at university.

④ Lena worked with her grandmother for a month.

問 2　Why did Lena's first scarves fade? **29**

① She used synthetic dyes by mistake.

② Her process left out two important steps.

③ Customers washed them in hot water.

④ The plants she used were too old.

問 3 Choose **two** things Lena learned from her grandmother's method. (The order does not matter.) **30** **31**

① Wood ash made the water alkaline.

② Synthetic dyes were cheaper.

③ Cloth should be dried only once.

④ Fermentation helped the dye bond with the fibres.

⑤ Clay pots made the colour green.

問 4 What does Lena mean by "I needed both"? **32**

① She needed two loans to start her company.

② She needed workers from two countries.

③ She needed to sell scarves and shirts.

④ Scientific knowledge and traditional skill were both necessary.

第7問 （配点 16）

あなたは環境についての発表のために、次の記事を読んでスライドを作っています。

Why Are Cities So Hot?

On a summer evening, the centre of a large city can be several degrees warmer than the countryside around it. In Tokyo, for example, the average temperature has risen by about three degrees over the past hundred years, while the global average has risen by about one degree. This is known as the **urban heat island** effect, and it is becoming more serious as cities grow and summers become hotter. More than half of the world's population now lives in cities, and this figure is expected to reach two-thirds by 2050.

There are three main causes. First, dark surfaces such as asphalt roads and concrete buildings absorb sunlight during the day and release the heat slowly at night, so cities cool down much less after sunset. Second, cities have fewer trees and less soil. In the countryside, plants release water through their leaves, and this evaporation cools the air — rather like sweat cooling our skin. Third, cars, factories and air conditioners all produce waste heat. Ironically, the hotter a city becomes, the more people use air conditioners, which makes the streets outside even hotter.

The effects are serious. Hot nights make it harder for the body to recover, and the risk of heatstroke rises, especially for elderly people. Hot weather also affects how well people work and learn: studies of schools without air conditioning have found that students' test scores fall on very hot days. Electricity demand also increases sharply on hot days, which can lead to power cuts. There are also effects on the environment: warm rainwater running off hot roads and roofs can raise the temperature of rivers, harming fish and other wildlife. Poorer neighbourhoods often suffer most, because they tend to have fewer parks and older buildings without good insulation.

Cities have tried several solutions, each with advantages and disadvantages. **Green roofs**, covered with plants, cool buildings and absorb rainwater, but they are expensive to build and many older buildings cannot support their weight. **Cool roofs**, painted white or a light colour, reflect sunlight and are cheap, but they work best on flat roofs and need repainting as they get dirty. **Street trees** provide shade and cool the air through evaporation, but they take many years to grow and need space and water. Their roots can also damage pavements and underground pipes if the wrong kind of tree is chosen.

City planning matters too. Tall buildings packed closely together can trap heat and block the wind. Some cities, including Stuttgart in Germany, have kept open "wind paths" — wide streets, rivers and parks that allow cool air from the surrounding hills to flow into the centre at night. Planners there limit the height of new buildings along these routes.

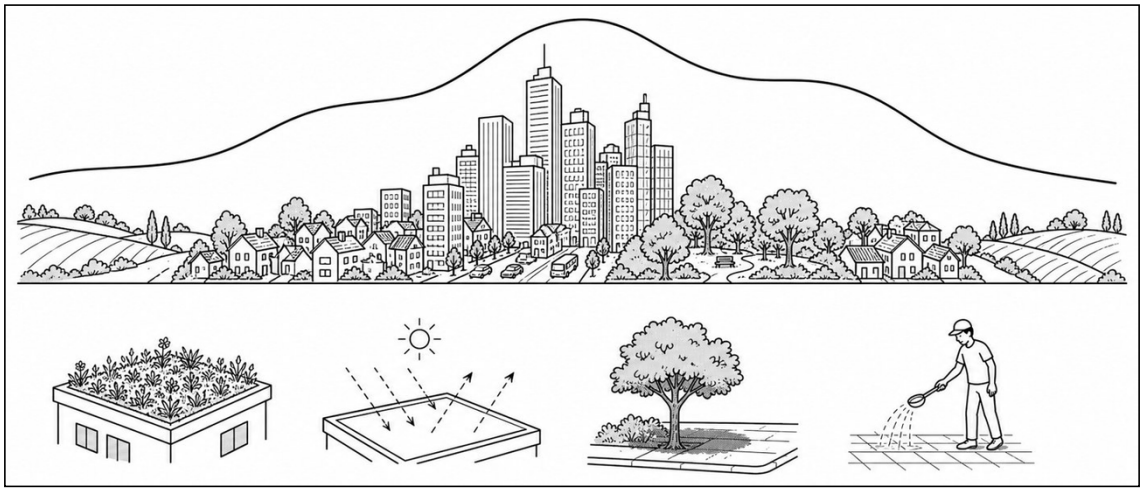

Some cities are also using water. In parts of Tokyo, shopkeepers sprinkle water on the pavement in a traditional practice called *uchimizu*. As the water evaporates, it can lower the surface temperature by several degrees, although the effect lasts only a short time. Modern versions of this idea include "mist showers" in public squares and fountains that children can play in, which have become popular in cities such as Paris and Madrid.

Measuring the problem is the first step. Many cities now use sensors on lamp posts, satellites and even volunteers with small thermometers on their bicycles to map which streets are hottest. In one study in the United States, the difference between the hottest and coolest neighbourhoods in the same city was more than 8°C on a summer afternoon. Such maps help planners decide where new trees or cool roofs are needed most.

No single solution is enough. Experts recommend combining different methods depending on the type of neighbourhood: cool roofs on factories and warehouses, green roofs on new buildings, and as many trees as possible along streets where people walk. Individuals can help too, for example by growing plants on balconies, closing curtains during the hottest part of the day and choosing light-coloured materials when they repair their homes. Each small step may seem unimportant, but together they can make a real difference to how hot our cities feel.

The Urban Heat Island Effect

- Causes: dark surfaces / fewer plants / (問1)
- Effects: heatstroke, power cuts
- Solutions compared: (A) cheap, needs repainting / (B) absorbs rain, heavy
- Recommendation: (問4)

問 1　Which best completes the "Causes" line on the slide? **33**

① too much rain
② cold winds from the sea
③ waste heat from cars and machines
④ too many parks

問 2　According to the article, why do plants help to cool the air? **34**

① Water evaporating from their leaves takes heat away.
② They reflect all sunlight back into the sky.
③ They produce cold air at night.
④ They stop people from using air conditioners.

問 3　Which solutions are (A) and (B) on the slide?
(A) **35** (B) **36**

① Green roofs　② Cool roofs　③ Street trees　④ Uchimizu

問 4 Which best completes the "Recommendation" on the slide? **37**

① Paint every building white.
② Replace all roads with soil.
③ Use uchimizu instead of other methods.
④ Combine methods to suit each type of area.

問 5 Your town plans to cool a busy shopping street where many people walk but there is little space for buildings to change. Based on the article, which is the best first step? **38**

① Put green roofs on old wooden shops.
② Plant street trees and support shopkeepers who sprinkle water on hot days.
③ Encourage shops to use more air conditioning.
④ Build a large car park to reduce traffic.

第8問 （配点 17）

あなたは「町の交通をどう変えるか」についてプレゼンテーションをするために、次の資料を集めました。

Source A — Article: "Short Trips, Big Impact"

In many towns, more than half of all car journeys are shorter than five kilometres — a distance most people can cycle in under twenty minutes. Short car journeys are the least efficient: engines use the most fuel and produce the most pollution when they are cold. When the town of Lindwick built a network of protected cycle lanes in 2019, the share of people cycling to work rose steadily. The lanes were separated from cars by low concrete barriers, and new bicycle parking was added at the station and in the town centre. Local businesses on the main street initially worried about losing parking spaces, but a study two years later found that people arriving by bike visited shops more often and spent about the same amount per month as drivers. Cycling also became more popular among women and older people, groups that had rarely cycled before the lanes were built. Some residents, however, complained that the work caused traffic jams while the lanes were being built. The town also found that families became more willing to let children cycle to school once the lanes were separated from traffic. Before 2019, only 3% of primary school children in Lindwick cycled to school; by 2022, the figure was 11%.

Year	2018	2019	2020	2021	2022
People cycling to work (%)	4	6	9	12	14
Road accidents involving cyclists	38	35	27	22	21

Source B — Opinions

Before deciding whether to build lanes in our own town, our class collected these comments from people in Lindwick.

Mr. Hall (resident, 68): I can't cycle because of my knees. If roads become narrower for cars, how will people like me get to the hospital? I'm not against cyclists, but I don't want to be forgotten.

Ms. Sato (café owner): I was against the lanes at first. Now my regular customers include many cyclists who stop for coffee on their way to work.

Dr. Patel (doctor): Thirty minutes of cycling a day lowers the risk of heart disease. It's one of the cheapest health measures a town can take. Fewer cars also mean cleaner air, which matters a great deal for patients with asthma.

Aoi (student, 16): I cycle to school every day. Before the lanes, my parents were worried because buses passed very close to me. Now I feel safe, and I arrive more awake than when I took the bus.

Mrs. Novak (taxi driver): Some roads are now slower for cars at busy times, and my customers notice it. But I have to admit there are fewer near-misses with cyclists than before.

Mr. Grey (councillor): Building lanes costs money. I would support a one-year pilot scheme on two roads first, with buses kept free-flowing. If the results are good, we can expand it; if not, we will have spent much less.

Source C — Report: "What Went Wrong in Harwood?"

Not every cycle lane project succeeds. In 2020, the town of Harwood painted cycle lanes on several busy roads in just a few weeks, without asking residents for their views. The lanes were not physically separated from traffic, so many people still felt unsafe, and the number of cyclists hardly changed. At the same time, drivers complained about longer journeys, and local shops reported fewer customers during the construction period.

After eighteen months, the council removed most of the lanes. A later review concluded that the problem was not the idea itself but the way it had been carried out. It recommended that towns consult residents early, start with a small trial, use barriers to separate cyclists from cars, and measure the results carefully before deciding whether to expand the scheme. Two years later, Harwood began a new trial on a single road, this time with barriers and regular meetings with residents.

プレゼンテーションの構成メモ

Title: Cycling Towards a Better Town

Step 1: Problem → {問1}

Step 2: Evidence → {問2}・{問3 (two answers)}　Concerns → {問4}

Step 3: Proposal → {問5}

問 1　Which statement best describes the "problem" in Step 1? **39**

① There are not enough cars in most towns.
② Many short journeys that could be cycled are made by car.
③ Cyclists cause most road accidents.
④ Shops on main streets are too expensive.

問 2　Which statement is supported by the table? **40**

① Cycling to work decreased after 2019.
② Accidents involving cyclists increased as more people cycled.
③ The share of people cycling doubled between 2021 and 2022.
④ Accidents involving cyclists fell while the share of cyclists rose.

問 3　Choose **two** benefits supported by the sources. (The order does not matter.) **41** **42**

① Cyclists continued to spend money in local shops.
② Building cycle lanes causes no traffic problems.
③ Cycling lanes make cars faster.
④ Everyone can cycle regardless of age or health.
⑤ Regular cycling can improve people's health.

問 4　Which concern should be included in Step 2? **43**

① Cyclists spend less money than drivers.
② Doctors do not recommend cycling.
③ People who cannot cycle may find it harder to travel by car.
④ Cycle lanes increase accidents.

問 5 Which proposal best reflects all the sources? **44**

① Start a one-year trial of protected lanes on a few roads, keep buses and access for people who cannot cycle, and measure the results.

② Ban cars from the whole town immediately.

③ Stop building cycle lanes because they are expensive.

④ Build lanes only for people under 30.

解答用紙（マークシートの代わり）

選んだ番号を○で囲む。採点後、間違えた番号に印をつけ、解説で根拠の位置を確かめる。

解答番号	①	②	③	④	⑤	⑥	⑦	⑧	⑨
1	①	②	③	④	⑤	⑥	⑦	⑧	⑨
2	①	②	③	④	⑤	⑥	⑦	⑧	⑨

得点の目安

80点以上：難関国公立の合格圏／65点：中堅国公立・共テ利用の標準／50点：平均点前後。第5問以降で崩れる人は「設問を先に読み、探す情報を決めてから本文へ」を徹底する。

解説

第1問 案内・メモ（情報の読み取り）

本文の要旨

ホストマザー Karen が冷蔵庫に貼ったメモ。週末は家族が留守にするため、留学生 Riku への頼みごとが書かれている。
植物の水やり（ベランダは土曜だけ）、ネコのえさ（朝夕。薬は朝だけ）、日曜朝のごみ出し。困ったら隣の Mr. Lee に連絡する。

問 1 解答番号 1 **正解 ②** （2点）

ごみ出しは日曜の朝8時前。① ベランダの水やりは土曜だけ。③ 薬は朝のえさにだけ入れる。

問 2 解答番号 2 **正解 ④** （2点）

"it's supposed to rain on Sunday" → ④。

問 3 解答番号 3 **正解 ①** （2点）

隣の Mr. Lee が合鍵を持っている → ①。③ 家族が帰るのは日曜の夜。

語句 balcony バルコニー ／ tablet 錠剤 ／ bin（英）ごみ箱 ／ spare key 合鍵

第2問 調査結果とコメント（事実と意見）

本文の要旨

イギリスの大学新聞が、学生500人にキャンパスの食堂について調査した記事。項目別の満足度グラフ、食堂の改善予定、学生のコメント。

問 1 解答番号 4 **正解 ④** （3点）

待ち時間 29% が最も低い。

問 2 解答番号 5 **正解 ①** （3点）

"the best I've had" は Fatima の評価（意見）。②③④ は確認できる事実。

問 3 解答番号 6 **正解 ③** （3点）

Josh の問題は待ち時間 → 2つ目のカウンターで行列を減らす → ③。

問 4 解答番号 7 **正解 ②** （3点）

ビーガン向けの選択肢が少ないという不満 → 来学期に新メニューが入る → ②。

語句 refectory（英）大学の食堂 ／ vegan 完全菜食の ／ queue（英）列 ／ add up 積み重なる

第3問 物語（出来事の順序・語句の意味）

本文の要旨

中学生の Hina は、町の慈善イベント「アヒルのおもちゃレース」を手伝う。前夜の大雨で川が増水し、中止の危機に。
Hina は公園の横の静かな運河を使う案を出し、レースは無事に開かれた。集まったお金は川の清掃団体に寄付された。

問 1 解答番号 8 **正解 ①** （3点）

前夜の大雨で川が増水し、速く流れていた。「アヒルの半分が海へ流れてしまう」。

問 2 解答番号 9・10・11・12 **正解 ④→②→①→③** （3点・完答）

前夜の大雨 → 運河を提案 → 網を持って岸に並ぶ → 老人が優勝。
⑤ 今年は橋から落とさず、運河で行われたので起こっていない。

問 3 解答番号 13 **正解 ③** （3点）

大雨の後で、茶色く、いつもより速く流れて枝を運んでいる → 増水した → ③。

語句 charity 慈善 ／ swollen 増水した ／ canal 運河 ／ lock（運河の）水門 ／ litter ごみ

第4問 推敲（下書きとコメント）

本文の要旨
高校生 Mao の意見文「学校の図書館をもっと長く開けるべきだ」の下書き。理由は「家に静かな場所がない生徒がいる」「図書館にしかない資料がある」。費用の反論にも答える。

問 1 解答番号 14 **正解 ②** （3点）

前文の「家に静かな場所がない生徒たち」を受けて「そうした生徒にとって」→ ②。

問 2 解答番号 15 **正解 ③** （3点）

「受験生には特に価値がある」の直後（c）に置くと、3年生の64％という数字がその主張を裏づける。
(d) だと「友だちと勉強したい」という別の話の後になり、つながりが弱い。

問 3 解答番号 16 **正解 ④** （3点）

前の文の反論（費用がかかる）に応答し、後の文（保護者や大学生が交代で見守る）につながる → ④。

問 4 解答番号 17 **正解 ①** （3点）

主張（7時まで開館）＋理由2つ（静かな場所・資料）＋反論への答え（ボランティア）をすべて含む → ①。

語句 reference book 参考図書 ／ supervise 監督する ／ take turns 交代でする ／ entrance exam 入学試験

第5問 講座案内・時間割・メール（複数資料の照合）

本文の要旨
イギリスの語学学校のサマーコース案内（午前は全員英語、午後は選択講座）、Ken の申込、学校からの返信メール。
定員超過で第1希望に入れず第2希望、週末旅行は追加料金、寮の部屋の変更などを照合する。

問 1 解答番号 18 **正解 ①** （3点）

料理は定員でキャンセル待ち、ひとまず第2希望の **Drama**。

問 2 解答番号 19・20 **正解 ②・⑥（完答）** （3点・完答）

{1}：浴室つきの部屋が満室 → 標準の部屋 **£250**（②）。
{2}：ロンドン £45 ＋ ケンブリッジ £35 ＝ **£80**（⑥）。

問 3 解答番号 21 **正解 ④** （3点）

Drama は月・水・金 → ④。① は料理の曜日。

問 4 解答番号 22 **正解 ②** （3点）

A：キャンセル待ちなので空けば入れる → 正。C：Drama は最終金曜に発表 → 正。
B：標準の部屋に変更 → 誤。D：開講前の日曜16時までに到着 → 誤。

問 5 解答番号 23・24 **正解 ③・⑤（順不同）**　（4点・順不同・完答）

③ 部屋の差額が引かれる → 宿泊費は予定より安くなる。⑤ ロンドン（土）とケンブリッジ（日）の両方が確定。
① 英語の授業は午前。② 料理に入れていないので不要。④ 1クラス12人まで。

語句 elective 選択科目 ／ accommodation 宿泊施設 ／ en-suite（英）浴室つきの ／ excursion 遠足・小旅行 ／ waiting list キャンセル待ち

第6問 物語文＋発表メモ（時系列・人物の変化）

本文の要旨
架空の人物「Lena Okafor」の物語。ナイジェリア出身の祖母から聞いた布の染め方に興味を持ち、イギリスで化学を学んだあと、植物由来の染料で布を染める小さな会社を始めた。
最初の製品は洗うと色が落ちて返品が続いたが、祖母の方法（灰と発酵）を化学的に分析して色落ちしない方法を見つけ、地域の女性たちを雇うようになった。
※設問の題材としての架空の人物です。

問 1 解答番号 25・26・27・28 **正解 ③→①→④→②**　（3点・完答）

大学で化学（第2段落）→ 会社を始める（第3段落）→ 祖母のもとで1か月（第4段落）→ 地域の女性を雇う（第5段落）。

問 2 解答番号 29 **正解 ②**　（3点）

”Her own factory method had skipped both steps to save time.” → 灰（アルカリ）と発酵の2工程を省いていた → ②。

問 3 解答番号 30・31 **正解 ①・④（順不同）**　（3点・順不同・完答）

① 灰で水がアルカリ性になる。④ 発酵で染料が繊維にしっかり結びつく。③ 何度も浸して乾かす。⑤ 緑になるのは空気に触れるため。

問 4 解答番号 32 **正解 ④**　（3点）

「学位は色を説明した。祖母は色の作り方を知っていた」→ 科学と伝統の両方が必要 → ④。

語句 dye 染料・染める ／ fade 色あせる ／ ferment 発酵させる ／ refund 返金 ／ synthetic 合成の

第7問 論理的な文章＋スライド（要点・応用）

本文の要旨
「都市の暑さ（ヒートアイランド現象）」の説明文。原因（アスファルト・建物が熱をためる、緑の少なさ、エアコンの排熱）、影響（熱中症・電力消費）、
対策（屋上緑化・明るい色の屋根・街路樹・水を使った冷却）と、それぞれの長所・短所。

問 1 解答番号 33 **正解 ③**　（3点）

第2段落の3つ目の原因：車・工場・エアコンの排熱 → ③。

問 2 解答番号 34 **正解 ①**　（3点）

葉から水が蒸発し、汗が肌を冷やすように空気を冷やす → ①。

問 3 解答番号 35・36 **正解 ②・①（完答）**　（4点・完答）

（ A ）安いが汚れると塗り直しが必要 → cool roofs（②）。（ B ）雨水を吸収するが重く高価 → green roofs（①）。

問 4 解答番号 37 **正解 ④**　（3点）

最終段落「単独の対策では不十分。地域の種類に合わせて組み合わせる」→ ④。③ 効果は短時間しか続かない。

問 5 解答番号 38 **正解 ②** （3点）

人が歩く通りには街路樹（最終段落）、さらに打ち水で短時間でも表面温度を下げられる → ②。① 古い建物は重さに耐えられないことが多い。③ 排熱が増えて逆効果。

語句 urban heat island ヒートアイランド ／ absorb 吸収する ／ reflect 反射する ／ evaporation 蒸発 ／ heatstroke 熱中症

第8問 複数の資料＋論説文の構成（統合・要約）

本文の要旨

テーマ「自転車をもっと町の交通手段に」。調査記事（短距離の移動に車を使う人の多さ、自転車レーンを作った町の変化）、表（自転車通勤の割合と交通事故の推移）、
住民・店主・医師・市議会議員の意見。生徒のプレゼンテーションの構成メモを完成させる。

問 1 解答番号 39 **正解 ②** （3点）

Source A 冒頭：車の移動の半分以上が5km未満（自転車で20分以内）→ ②。

問 2 解答番号 40 **正解 ④** （3点）

自転車通勤 4→14％ に増加、事故 38→21件 に減少 → ④。② 逆。③ 12→14％ で2倍ではない。

問 3 解答番号 41・42 **正解 ①・⑤（順不同）** （4点・順不同・完答）

① 自転車の客は来店が多く、月の支出は車の客とほぼ同じ（Source A・Ms. Sato）。⑤ Dr. Patel：心臓病のリスクが下がる。
② 工事中の渋滞の苦情がある。④ Mr. Hall は膝のため乗れない。

問 4 解答番号 43 **正解 ③** （3点）

Mr. Hall：自転車に乗れない人は、車道が狭くなると病院に行きにくい → ③。①②④ は資料と逆。

問 5 解答番号 44 **正解 ①** （4点）

Mr. Grey（試行・バス優先）、Mr. Hall（自転車に乗れない人への配慮）、データで効果を測る → ①。
②③④ は極端または資料と合わない。

語句 commute 通勤する ／ cycle lane 自転車専用レーン ／ emission 排出 ／ parking space 駐車スペース ／ pilot scheme 試行計画
