大学入学共通テスト 予想問題（2025年度～ 新課程の形式） 第5回

外 国 語
〔英語（リーディング）〕

試験時間 80分	配点 100点	解答数 44	英文の量 約5,060語

テーマ：友人との約束・アウトドア用品・書道・スマートフォン・環境コンテスト・音楽と振動・習慣・お金の教育

80分・100点・大問8・解答数44 オリジナル問題（本文・設問・解説すべて書き下ろし）

注 意 事 項

1 **本番と同じ順で80分で解く**。時間配分の目安：第1～3問 15分／第4問 10分／第5問 13分／第6問 13分／第7問 13分／第8問 14分（見直し2分）。
2 答えは「解答用紙」の番号に○。終わったら「正解と配点」で採点し、「解説」で根拠の場所を確認する。
3 本番の傾向（情報の検索・事実と意見の区別・推敲・複数資料の統合・要約・論理展開）をすべての大問で再現しています。
4 各大問の解説の最初に**本文の要旨（日本語）**があります。読み終えた後の内容確認に使えます。

第1問	テキストメッセージ（情報の読み取り）
第2問	商品紹介とレビュー（事実と意見）
第3問	体験談（出来事の順序・心情）
第4問	推敲（下書きとコメント）
第5問	コンテスト要項・応募用紙・メール（複数資料の照合）
第6問	物語文＋発表メモ（時系列・人物の変化）
第7問	論理的な文章＋スライド（要点・応用）
第8問	複数の資料＋論説文の構成（統合・要約）

第1問 （配点 6）

あなたはイギリスに留学中です。友人の Oliver とメッセージをやりとりしています。

Oliver
Hi Sakura! Are we still on for the film on Saturday? I just checked, and the 6 o'clock showing has moved to 7:15. Apparently there was a problem with the projector, so they've changed the times for the whole evening.

Sakura
That's fine with me. It means we can have dinner first! There's a new Thai restaurant next to the cinema that I've wanted to try.

Oliver
Actually, my manager asked me to cover a shift at the café until 6:30. I don't think I can make dinner. Sorry! Maybe we can try the Thai place another time.

Sakura
No problem. Shall I buy the tickets online so we don't have to queue? Saturday evenings are always busy.

Oliver
That would be brilliant, thanks. Could you get seats near the back? I don't like sitting too close to the screen. Get two student tickets — they're £6 each. Don't forget to bring your student card, because they sometimes check at the door. I'll pay you back on Saturday.

Sakura
OK! I'll sort them out tonight. Let's meet in front of the cinema at 7. I'll get some popcorn while I'm waiting for you.

問 1 What time will the film start? **1**

① 6:00　② 6:30　③ 7:00　④ 7:15

問 2 Why can't Oliver have dinner with Sakura? **2**

① He has to work until 6:30.
② He does not like the restaurant.
③ He has already eaten.
④ He has to buy the tickets.

問 3 How much will Oliver give Sakura on Saturday? **3**

① £3　② £6　③ £12　④ Nothing

第2問 （配点 12）

あなたは夏のキャンプに持っていく道具を探しています。次のウェブサイトを見つけました。

SunFold Portable Solar Charger

Going camping, hiking or cycling? Charge your phone anywhere the sun shines! The SunFold folds to the size of a paperback book and weighs only 450 grams. It has two USB ports, so you can charge two devices at once. The four solar panels are covered with strong plastic to protect them from scratches, and a small light shows when the charger is working.

Feature	Details
Charging time (phone)	About 3 hours in full sun; 6–8 hours on cloudy days
Water resistance	Splash-proof (not for use in heavy rain)
Price	£39.99 (free delivery on orders over £30)
Guarantee	1 year

Guarantee: If the SunFold stops working within one year, we will repair or replace it free of charge. Damage caused by heavy rain is not covered. **Tip:** For the fastest charging, place the SunFold so that the panels face the sun directly. Charging through a window or in the shade will take much longer. Do not leave your phone in direct sunlight for long periods, as it may overheat.

Customer reviews

Jack ( ): I took it on a week-long walking holiday in Wales. My phone never ran out of battery. Absolutely worth every penny. It was sunny most of the week, which helped.

Priya ( ): It works, but it took most of the day to charge my phone when it was overcast. Fine for summer, less useful in autumn. Delivery was quick, though, and it arrived in two days.

Mei ( ): I bought it for my commute in winter, but there just isn't enough sunshine in the mornings. It would be much better with a built-in battery so that it could store power for later.

Tom ( ): Light and easy to carry. I attach it to my rucksack while I walk. It got wet in a shower and still works. I only wish it came with a longer cable.

問 1 What can the SunFold do? **4**

① Charge a phone in one hour
② Work in heavy rain
③ Charge two devices at the same time
④ Store electricity for a whole year

問 2 Which of the following is a **fact** stated in the reviews? **5**

① The charger is worth every penny.
② It is less useful in autumn.
③ It is light and easy to carry.
④ Tom attaches it to his rucksack.

問 3 Priya's experience matches which information on the website? **6**

① It weighs 450 grams.

② Charging takes 6–8 hours on cloudy days.

③ Delivery is free.

④ It has a one-year guarantee.

問 4 Based on the information, who would find the SunFold **least** suitable? **7**

① Someone camping in a place where it rains heavily all week

② A student walking in sunny weather

③ A cyclist who needs to charge a phone and a camera

④ A hiker who wants a light charger

第3問 （配点 9）

あなたは留学生の体験談を集めたウェブサイトで、次の記事を読んでいます。

One Character, One Year

by Daniel Moreau

When I arrived at my Japanese high school as an exchange student from France, my host sister Aya invited me to visit the calligraphy club. I expected it to be easy — after all, I had beautiful handwriting in French. I was wrong. My first attempt at the character for "river" looked like three tired worms. The other members were too polite to laugh, but I saw Aya hide a smile behind her hand.

The club advisor, Mr. Kondo, watched me for a while. "You write very fast," he said. "In calligraphy, the brush is not a pen. Each stroke must have a beginning, a middle and an end." He showed me how he slowly ground the ink stick before writing. "This is not wasted time," he said. "It calms the mind." I did not believe him. To me, it looked like a slow way of making something that you could buy in a bottle.

I started coming to the club room twenty minutes before morning lessons. At first, I did it because I was embarrassed by my poor work. Later, I realised I was looking forward to it. The quiet room, the smell of the ink and the sound of the brush on paper became my favourite part of the day. Sometimes Mr. Kondo came in early too, and we worked side by side without saying a word.

Slowly, my work began to change. Mr. Kondo rarely praised anyone, so when he looked at one of my characters in September and said, "Better," I almost dropped my brush. Aya told me later that it was the first time she had heard him say that word to a first-year member. By then, I had stopped comparing my writing with my French handwriting. Calligraphy was not about neat letters, I realised; it was about controlling my breath, my hand and my patience at the same time.

In October, Mr. Kondo told me I could submit a work to the school festival. I chose the character 縁 (en), which Aya had explained to me. It means a connection between people — the kind of bond that seems to happen by chance but feels meant to be. I wrote it more than two hundred times. On the last day before the deadline, I finally wrote one I was not ashamed of. It was not perfect — one stroke was a little too thin — but when I looked at it, I felt calm, the way Mr. Kondo had described.

At the festival, an elderly visitor stood in front of my work for a long time. Then she turned to me and said, in slow English, "This character is right for you." I did not know how to answer, so I bowed, the way I had seen Aya do. I did not win a prize, but I have never been prouder of anything. The work now hangs in my room in Lyon, and every time I look at it, I think of Aya, Mr. Kondo and the quiet mornings in the club room.

問 1　What did Mr. Kondo say was Daniel's main problem at first? **8**

① He used too much ink.

② He held the brush like a pen.

③ He wrote too quickly.

④ He chose characters that were too difficult.

問 2 Put the following events into the order in which they happened.

9 → **10** → **11** → **12**

① Daniel chose the character 縁.

② Daniel wrote a character that looked like worms.

③ An elderly visitor spoke to Daniel.

④ Daniel began practising before morning lessons.

⑤ Daniel won a prize at the festival.

問 3 How did Daniel's feelings about the morning practice change? **13**

① He started because he was embarrassed, but came to enjoy it.

② He enjoyed it at first, but later found it boring.

③ He always disliked it but did it for Aya.

④ He did it only to win a prize.

第4問 （配点 12）

あなたは英語の授業で意見文を書いています。次は Yuto の下書きと先生のコメントです。

Smartphones Can Be Learning Tools

At my school, students must keep their smartphones in their bags all day. I think teachers should allow us to use them in some lessons, because they can help us learn. In this essay, I will give two reasons and respond to a common concern.

First, smartphones let us find information quickly. In social studies, for example, we could check current news or look at maps and photos of the places we are studying. **(a)** This makes lessons more connected to the real world. **(b)** Textbooks are useful, but they cannot show us what happened yesterday.

Second, smartphones are useful for practising English pronunciation. **[B]** many apps can listen to our voice and tell us which sounds we need to improve. **(c)** In a class of forty students, the teacher cannot check everyone's pronunciation, even if the lesson is fifty minutes long. **(d)**

Of course, some people worry that students will play games or use social media during lessons. This is an understandable concern. My brother has a new smartphone with a great camera. Many schools in other countries already allow phones in class for specific tasks, and they report few problems. Clear rules, such as using airplane mode and putting phones face down when the teacher is speaking, can reduce this problem. Teachers could also collect phones at the start of tests and keep them in a box at the front of the room.

[D] In conclusion, smartphones are popular among students, so schools should think about them.

先生のコメント

A：第3段落に、アプリが特に役立つ理由をもう1文加えましょう。

B：前後をつなぐ語句を入れましょう。

C：下線部は反論への応答になっていません。差し替えましょう。

D：結論で、主張・理由・反論への答えをまとめましょう。

問 1 Based on Comment A, where is the best place to add the following sentence?
"With an app, however, each of us can get feedback whenever we practise." **14**

① (a)　② (b)　③ (c)　④ (d)

問 2 Based on Comment B, which is the best expression to put in **[B]**? **15**

① However,　② In contrast,　③ For example,　④ As a result,

問 3 Based on Comment C, which is the best sentence to replace the underlined one? **16**

① However, this risk can be managed.
② Many games are free to download.
③ Smartphones are expensive to repair.
④ Some teachers do not have smartphones.

問 4 Based on Comment D, which is the best way to rewrite the conclusion? **17**

① In conclusion, smartphones should be banned from schools.

② In conclusion, with clear rules, smartphones can help us find information and practise pronunciation, so schools should allow them in some lessons.

③ In conclusion, everyone should buy a new smartphone.

④ In conclusion, social media is useful for learning.

第5問 （配点 16）

あなたは留学先の高校の友人と、次のコンテストに応募しようとしています。次の資料を読みなさい。

Green Futures Challenge 2026

Have an idea that could make your school or town greener? Every year, hundreds of young people across the country take part in our competition. Enter the Green Futures Challenge! Teams of **2 to 4 people** may enter. Each team must have a teacher or another adult who supports the project, but all the work must be done by the students themselves.

Category	Age of all members	What to submit
Junior	11–14	A poster (A2 size) explaining your idea
Senior	15–18	A 3-minute video and a one-page written plan
Open	Mixed ages (11–18)	A 3-minute video only

Deadline: 31 March, 5 p.m.
Prizes (each category): 1st — £500 for your school and a meeting with an environmental scientist; 2nd — £200; 3rd — £100.
Five shortlisted teams in each category will present their ideas to the judges on 25 April. The results will be announced on our website on 2 May.

Entry Form (summary)

Team name	The Rain Savers	Members	Ruby (16), Ken (17), Amir (13)
Idea	Collecting rainwater from the school roof to water the garden	Contact	Ruby Hart

From: Green Futures Team
To: Ruby Hart
Subject: Your entry

Dear Ruby,

Thank you for registering "The Rain Savers." Your idea sounds very interesting, and we look forward to seeing your submission. Because of the ages of your members, your team has been entered in the category that matches your group. Please make sure your submission meets the requirements for that category. Submissions that do not follow the rules for their category cannot be judged.

Good news: because of the school holidays, the deadline has been extended to **7 April**. Also, shortlisted teams can now choose to present on 25 April either in person in Birmingham or online. Teams who come to Birmingham will receive help with travel costs of up to £50 per person, and lunch will be provided. Online presentations will take place by video call, and each team will have ten minutes to present followed by five minutes of questions from the judges.

Good luck!
Green Futures Team

Judging criteria (all categories)

• **Impact (40%)**: How much would your idea help the environment?
• **Practicality (30%)**: Could your idea really be carried out at your school or in your town? Have you thought about the cost?
• **Creativity (20%)**: Is your idea new, or does it use an existing idea in a new way?
• **Communication (10%)**: Is your submission clear and easy to understand?

Last year's Senior winners, from a school in Leeds, designed a system for collecting food waste from the school canteen and turning it into compost for local farms. Their school used the £500 prize to buy the first compost bins, and the system is still running today. **FAQ:** Can one student join more than one team? — No, each student may be a member of only one team. Can we change members after registering? — Yes, until the deadline, as long as the new members are within the age range of your category.

問 1 Which category has The Rain Savers been entered in? **18**

① Junior
② Senior
③ Open
④ They cannot enter because of Amir's age.

問 2 Complete the sentence.
The team must submit **19**, and if they win first prize, their school will receive **20**.

① a 3-minute video only　② a poster only
③ a video and a written plan　④ £100
⑤ £200　⑥ £500

問 3 By when must the team submit their entry? **21**

① 31 March　② 25 April　③ 5 April　④ 7 April

問 4 Which of the following statements are true? Choose the best combination.
A. A team of five people could enter.
B. The first prize includes money for the team's school.
C. Shortlisted teams must travel to Birmingham.
D. Each category has five shortlisted teams. **22**

① A and B　② A and C　③ B and C　④ B and D

問 5 Which **two** can be inferred from the materials? (The order does not matter.) **23** **24**

① Amir is too young to enter any category.

② If the team wins first prize, they may meet a scientist.

③ The team must make a poster.

④ The team has more time to prepare than originally planned.

⑤ All presentations must be given in person.

第6問 （配点 12）

あなたは英語の授業で、音楽と教育についての文章を読み、発表メモを作っています。

Music You Can Feel

Mariko Sato began playing the piano when she was four. By the age of twenty-five, she was teaching piano at a music school in Osaka. Then, after a serious illness, she lost most of her hearing within a single year. She stopped teaching and, for a long time, could not bring herself to open the piano at home. Friends tried to cheer her up by taking her to concerts, but she found them painful. She could see the musicians moving and the audience smiling, but the music itself had disappeared.

During those years, Mariko worked in an office, entering data into a computer. She was good at the job, but she felt as if a part of her had been switched off. She avoided music shops and changed the subject whenever friends talked about concerts. Her sister later said that Mariko had lost not only her hearing but also her way of understanding the world.

One evening, her young nephew was banging on a drum in the living room. Mariko, sitting on the wooden floor, suddenly realised she could feel each beat through her body. She took off her slippers and put her hands flat on the floor. Low notes made the floor tremble slowly; high notes felt like light tapping. "I could not hear the music," she later wrote, "but I could feel its shape." That night, for the first time in two years, she lifted the lid of her piano.

Mariko began experimenting. She played the piano with her bare feet on its wooden pedals and her hand resting on its side. Over several years, she developed a method for teaching rhythm and melody through vibration, using drums placed on the floor, balloons that people hold against their chests — because the thin rubber passes on even small changes in sound — and speakers that can be touched. She also learned to read the movement of other musicians' bodies, watching the rise and fall of their shoulders to follow the beat. Progress was slow, and there were weeks when she felt she was getting nowhere, but she kept a diary of every experiment, recording what worked and what did not.

When she proposed opening a music class for deaf children, many people were skeptical. Some parents worried that their children would feel frustrated. A local official told her that music was "not a priority" for deaf students. Mariko did not argue. Instead, she invited the parents to a free trial lesson. She asked them to close their eyes, cover their ears and hold a balloon while she played a drum. Several of them were in tears by the end. One father said afterwards that it was the first time he had understood how his son might experience the world. The next week, nine families signed up.

The class started with six children in a borrowed community hall, every Saturday morning. Mariko communicated with them in sign language, which she had learned after losing her hearing. The children took off their shoes at the door, sat in a circle on the wooden floor and began each lesson by "listening" to the floor with their hands. Within a year, the children were playing simple songs together on drums and xylophones, keeping perfect time by watching each other and feeling the floor. Ten years later, her school has trained more than eighty teachers, and similar classes have opened in four other countries.

One of her first students, a girl named Yui, later became a percussion teacher herself. In a television interview, Yui explained that before joining the class, she had thought music was something that belonged only to hearing people. "Mariko-sensei showed me that music was mine too," she said. Today, Yui runs workshops in schools, where hearing and deaf children play drums together on the same wooden stage.

Mariko still plays the piano every morning before work. When people call her story a miracle, she shakes her head. "Deaf children were always able to enjoy music," she says. "We simply had not found the right door."

発表メモ

Mariko Sato: Music You Can Feel

・Events in order → 問1 (four boxes)

・Her discovery → 問2

・How she won support → 問3

・What her story shows → 問4 (two answers)

問 1 Put the following events into the order in which they happened.

25 → **26** → **27** → **28**

① Mariko developed a method of teaching through vibration.

② Mariko felt a drum through the floor.

③ Mariko's class began with six children.

④ Mariko lost most of her hearing.

問 2 What did Mariko discover on the evening with her nephew? **29**

① Her hearing had returned.

② Her nephew wanted to learn the piano.

③ She could sense music through vibrations in her body.

④ Drums are louder than pianos.

問 3 How did Mariko respond to people who doubted her idea? **30**

① She let parents experience music through vibration themselves.

② She argued with the local official.

③ She gave up and returned to teaching piano.

④ She moved the class to another country.

問 4 Choose **two** statements that the story supports. (The order does not matter.) **31** **32**

① Deaf children cannot keep time in music.

② A personal difficulty can lead to a new way of helping others.

③ Music classes are a low priority for all schools.

④ Mariko's method requires expensive equipment.

⑤ The right approach can open music to people who were thought unable to enjoy it.

第7問 （配点 16）

あなたは健康や生活習慣についての発表のために、次の記事を読んでスライドを作っています。

How Habits Are Made

Have you ever arrived at school and realised that you cannot remember the journey? About 40% of what we do each day is not the result of a conscious decision, but of habit. Brushing our teeth, checking our phones when we wake up, taking the same route to school — these actions happen almost automatically. Understanding how habits form can help us build good ones and break bad ones. Habits save the brain a great deal of effort: once an action becomes automatic, we can do it while thinking about something else entirely.

Researchers often describe a habit as a loop with three parts. First comes a **cue**: something that triggers the behaviour, such as a time, a place or a feeling. Next is the **routine**, the behaviour itself. Finally, there is a **reward**, which makes the brain want to repeat the loop. For example, feeling bored (cue) leads us to check social media (routine), and seeing new messages (reward) makes us more likely to do it again next time we are bored. Over time, the brain begins to expect the reward as soon as it notices the cue, which is why habits can feel so hard to resist.

A popular idea says that it takes 21 days to form a new habit. However, a well-known study at a university in London found that the average was about 66 days — and the range was enormous, from 18 to 254 days. Simple actions, like drinking a glass of water after breakfast, became automatic much faster than complex ones, like doing fifty sit-ups before dinner. Participants in the study chose their own new behaviour and reported each day how automatic it felt, so the results show how habits form in real life rather than in a laboratory.

The same study found something encouraging: missing a day now and then did not seriously affect the process. What mattered was repeating the behaviour in a consistent situation. In other words, people who did their new habit at the same time and in the same place each day made faster progress than those who did it whenever they had a free moment. This is good news for anyone who has ever given up on a goal after one bad day.

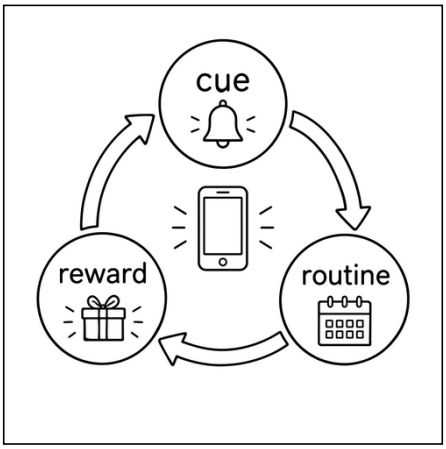

Experts suggest several strategies. One is "habit stacking": linking a new behaviour to an existing habit. For example, "After I brush my teeth at night, I will read one page of a book." Another is to start very small — two minutes of exercise rather than thirty — so that the behaviour feels easy. A third is to change your environment, so that the cue for a good habit is easy to see and the cue for a bad one is hidden. People who keep fruit on the kitchen table eat more fruit; people who leave their phones in another room sleep better. Rewards matter too: ticking a box on a calendar or telling a friend about your progress can give the brain a small sense of satisfaction that makes the habit more likely to stick.

Breaking a bad habit works in a similar way, but in reverse. Because the cue and the reward are what keep the loop going, it is often more effective to change the routine than to try to stop it completely. A student who checks social media whenever she feels bored, for example, might keep the same cue (boredom) and the same kind of reward (a short break) but replace the routine with a five-minute walk or a glass of water. Making a bad habit harder to do — by logging out of apps or leaving snacks in a high cupboard — also helps.

Relying on willpower alone rarely works for long. By designing the cues, routines and rewards in our lives, we can make good behaviour the easy choice. The aim is not to become a different person overnight, but to make small changes that, repeated over weeks and months, quietly add up.

Building Better Habits

- The habit loop: cue → routine → reward
- Time to form a habit: average (問2)
- Good news: (問3)
- Strategies: habit stacking / start small / change your environment

問 1 In the example in the second paragraph, which is the "reward"? **33**

① Feeling bored
② Checking social media
③ Waking up
④ Seeing new messages

問 2 Which best completes "Time to form a habit" on the slide? **34**

① exactly 21 days for everyone
② about 66 days, but it varies widely
③ at least 254 days
④ less than 18 days

問 3 Which best completes "Good news" on the slide? **35**

① Missing a day occasionally does not ruin progress.
② Complex habits form faster than simple ones.
③ Willpower is enough to form any habit.
④ Habits can be formed in one week.

問 4 Which **two** are examples of the strategies described in the article? (The order does not matter.) **36** **37**

① Promising yourself to exercise for two hours every day
② Waiting until you feel motivated
③ Doing ten squats every time you finish brushing your teeth in the morning
④ Putting your guitar on a stand in the living room instead of in its case
⑤ Changing the time of your new habit every day

問 5 Your friend Nao wants to study English vocabulary every day but keeps forgetting. Based on the article, which plan is the best? **38**

① Study 200 words every Sunday for three hours.

② Decide to study only when she feels like it.

③ Learn five words every day right after she eats breakfast, keeping her word book on the table.

④ Study at a different time each day so it doesn't get boring.

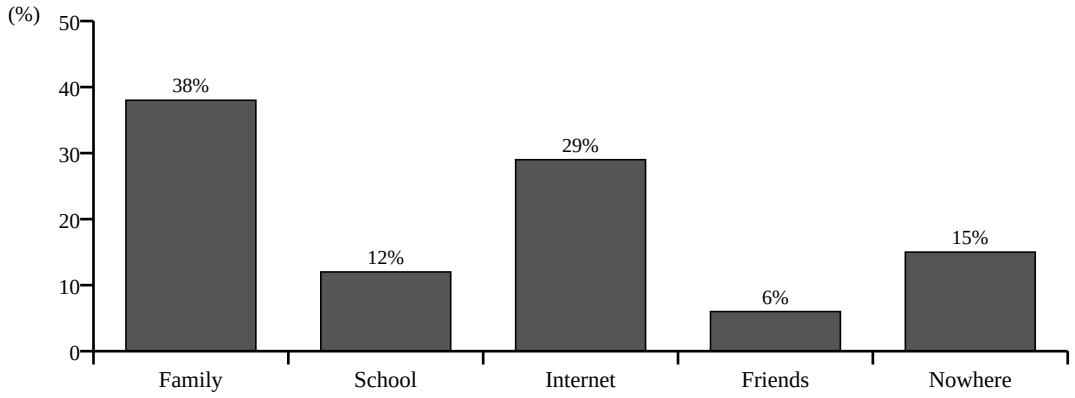

第8問 （配点 17）

あなたは「高校でお金の教育をもっと行うべきか」についてエッセイを書くために、次の資料を集めました。

Source A — Article

Should schools teach students how to manage money? A survey of 2,000 young adults aged 18 to 25 found that those who had taken a personal finance course at school were less likely to have credit card debt they could not repay. They were also more likely to have savings. However, the researchers point out that a single short course had little effect; the benefits were clearest among students who had studied the topic over several years and practised with realistic examples, such as planning a monthly budget. Young people today face financial choices earlier than their parents did. Many sign phone contracts, shop online with "buy now, pay later" services and are targeted by advertisements for investment apps while they are still at school. Experts warn that without basic knowledge, it is easy to make mistakes that take years to fix. In some countries, money education is already part of the national curriculum. In England, for example, it has been taught in secondary schools since 2014, although teachers say the amount of time given to it varies a great deal from school to school.

Where did you mainly learn about money? (Students, n = 600)

Source B — Opinions

Hana (student): I learned about money mainly from videos online, but I'm never sure which ones to trust. Some of them are clearly trying to sell something.

Mr. Evans (parent): Talking about money is the family's job. Schools already have too many subjects. I would rather teachers spent more time on maths and reading, which are the basis for everything else. At home, we give our children pocket money and let them make their own mistakes.

Ms. Mori (teacher): Not every family can teach this. If schools don't, the gap between students will grow. Some of my students have parents who have never had a bank account themselves.

Kenta (university student): When I moved out and started living alone, I had no idea how much to spend on food or electricity. By the end of my first month, I had almost no money left. I wish someone had taught me how to make a budget in high school.

Mr. Silva (bank employee): I often meet young customers who don't understand interest. Practical lessons — budgeting, comparing loans — are what they need, not just theory. Many of them are surprised to learn how much a small loan can grow if they only pay the minimum each month.

Source C — Example: A school programme

At Riverside High School, money lessons are spread across three years. In the first year, students learn to keep a simple record of what they spend. Students say the lessons feel useful because the examples come from their own lives. In the second year, they plan a monthly budget for an imaginary young adult with a part-time job, including rent, food and transport. In the third year, they compare real phone contracts and loans and calculate how much interest they would pay.

Teachers say the most popular activity is a role-play in which students must decide how to spend a fixed amount of money after an unexpected bill arrives. "It's the first time I've realised how quickly money disappears," one student said. The school invites local bank staff to answer questions once a term, but they are not allowed to advertise their own products.

エッセイの構成メモ

Title: Money Lessons for Everyone

Step 1: Position → {問1}

Step 2: Reasons → {問2 (two answers)}　Data → {問3}　Opposing view and response → {問4}

Step 3: Conclusion → {問5}

問 1　Which position best matches the title? **39**

① Money education should be left to families.

② All students should receive practical money education at school.

③ Only students who want to work in banks should learn about money.

④ Money should not be discussed with teenagers.

問 2　Choose **two** reasons supported by the sources. (The order does not matter.) **40** **41**

① Not all families are able to teach about money.

② Online videos are always reliable.

③ One short lesson is enough to change behaviour.

④ Students who studied finance at school were less likely to have unpayable debt.

⑤ Students learn most about money from school now.

問 3　Which statement is supported by the graph? **42**

① Most students learned about money at school.

② Friends were the most common source.

③ More students learned from the internet than from school.

④ Nobody said they had learned nowhere.

問 4　Which pair best shows an opposing view and a response to it? **43**

① Banks need more customers. / So schools should advertise banks.

② Videos are fun. / So students should watch more videos.

③ Theory is important. / So lessons should avoid examples.

④ Money is the family's job. / But not every family can teach it, so the gap may grow.

問 5 Which is the most suitable conclusion? **44**

① Schools should teach money skills over several years using practical tasks such as budgeting, while working with families.

② Schools should hold one lecture on money in the final year.

③ Students should learn about money only from the internet.

④ Families should stop talking about money at home.

解答用紙（マークシートの代わり）

選んだ番号を○で囲む。採点後、間違えた番号に印をつけ、解説で根拠の位置を確かめる。

解答番号	①	②	③	④	⑤	⑥	⑦	⑧	⑨
1	①	②	③	④	⑤	⑥	⑦	⑧	⑨
2	①	②	③	④	⑤	⑥	⑦	⑧	⑨
3	①	②	③	④	⑤	⑥	⑦	⑧	⑨
4	①	②	③	④	⑤	⑥	⑦	⑧	⑨

	問3	42	③	3	
	問4	43	④	3	
	問5	44	①	4	
合計		**44**		**100**	

得点の目安

80点以上：難関国公立の合格圏／65点：中堅国公立・共テ利用の標準／50点：平均点前後。第5問以降で崩れる人は「設問を先に読み、探す情報を決めてから本文へ」を徹底する。

解説

第1問 テキストメッセージ（情報の読み取り）

本文の要旨
イギリスに留学中の Sakura と、友人 Oliver のやりとり。週末の映画の約束。上映時間が変わり、Oliver はアルバイトで遅れるため、Sakura が先にチケットを2枚買っておくことになる。

問 1 解答番号 1 **正解 ④** （2点）
6時の上映が 7:15 に変更。③ 7時は待ち合わせの時刻。

問 2 解答番号 2 **正解 ①** （2点）
カフェで6時半まで代わりに働く → ①。

問 3 解答番号 3 **正解 ②** （2点）
学生チケット £6 × 2 を Sakura が立て替え → Oliver が払うのは自分の1枚分 £6。③ £12 は2枚の合計。

語句 showing（英）上映 ／ cover a shift 代わりに勤務に入る ／ sort out 手配する ／ pay back 返金する

第2問 商品紹介とレビュー（事実と意見）

本文の要旨
イギリスのアウトドア用品店のサイト。折りたたみ式の太陽光充電器「SunFold」の商品説明と仕様、購入者のレビュー。

問 1 解答番号 4 **正解 ③** （3点）
"two USB ports, so you can charge two devices at once" → ③。② 激しい雨では使えない。

問 2 解答番号 5 **正解 ④** （3点）
Tom がリュックに付けて歩くのは確かめられる事実。①②③ は評価（意見）。

問 3 解答番号 6 **正解 ②** （3点）
くもりの日はほぼ一日かかった ⇔ 表「くもりの日は6〜8時間」→ ②。

問 4 解答番号 7 **正解 ①** （3点）
激しい雨には対応していない（splash-proof のみ）＋晴れないと充電に時間がかかる → ①。

語句 solar panel 太陽電池パネル ／ waterproof 防水の ／ overcast くもりの ／ gadget 小型機器

第3問 体験談（出来事の順序・心情）

本文の要旨
留学生 Daniel が日本の高校の書道部に入った体験。最初はうまく書けず、先生に「速く書きすぎ」と言われる。毎朝の練習を重ね、文化祭で「縁」の字を出品する。

問 1 解答番号 8 **正解 ③** （3点）
"You write very fast" → ③。② は「筆はペンではない」という説明で、指摘の中心は速さ。

問 2 解答番号 9・10・11・12 **正解 ②→④→①→③** （3点・完答）
最初の「川」（第1段落）→ 朝練を始める（第3段落）→ 「縁」を選ぶ（第4段落）→ 文化祭で老婦人に話しかけられる（第5段落）。⑤ 入賞はしていない。

問 3 解答番号 13 **正解 ①** （3点）

"At first, I did it because I was embarrassed … Later, I realised I was looking forward to it." → ①。

語句 calligraphy 書道 ／ brush 筆 ／ stroke （文字の）画 ／ ink stick 墨 ／ patience 忍耐

第4問 推敲（下書きとコメント）

本文の要旨

高校生 Yuto の意見文「学校でスマートフォンを授業に活用すべきだ」の下書き。理由は「調べ学習」「英語の発音練習」。気が散るという反論にも答える。

問 1 解答番号 14 **正解 ④** （3点）

「40人では先生が全員を確認できない」（(c)の後の文）を however で受け、アプリなら一人ひとりが練習のたびに助言を得られると続ける → (d)。

問 2 解答番号 15 **正解 ③** （3点）

前の文（発音練習に役立つ）の具体例としてアプリの機能を挙げる → For example。

問 3 解答番号 16 **正解 ①** （3点）

反論（ゲームやSNS）を受け、後の「明確なルールで減らせる」につなぐ → ①。

問 4 解答番号 17 **正解 ②** （3点）

主張（一部の授業で許可）＋理由2つ（情報検索・発音練習）＋反論への答え（ルール）→ ②。

語句 distraction 気を散らすもの ／ pronunciation 発音 ／ rule ルール ／ airplane mode 機内モード

第5問 コンテスト要項・応募用紙・メール（複数資料の照合）

本文の要旨

イギリスの「若者向け環境アイデアコンテスト」の要項（部門・年齢・提出物・賞）、応募用紙、主催者からのメール。
年齢による部門分け、チームの人数、締め切りの延長、最終審査の形式（オンライン可）を照合する。

問 1 解答番号 18 **正解 ③** （3点）

13歳・16歳・17歳の混合 → 全員が同じ年齢帯でないので Open（11〜18歳の混合）。

問 2 解答番号 19・20 **正解 ①・⑥（完答）** （3点・完答）

{1}：Open 部門は「3分の動画のみ」→ ①（③ は Senior 部門）。
{2}：1位は学校に £500 → ⑥。

問 3 解答番号 21 **正解 ④** （3点）

メールで締め切りが 4月7日 に延長。① は要項の元の締め切り。

問 4 解答番号 22 **正解 ④** （3点）

B：1位は学校に £500 → 正。D：各部門5チームが最終候補 → 正。
A：2〜4人 → 誤。C：オンラインも選べる → 誤。

問 5 解答番号 23・24 **正解 ②・④（順不同）** （4点・順不同・完答）

② 1位には環境科学者との面会がある。④ 締め切りが1週間延びた。
① Open 部門なら参加できる。③ ポスターは Junior 部門。⑤ オンラインも可。

語句 category 部門 ／ shortlist 最終候補 ／ deadline 締め切り ／ prototype 試作品 ／ mentor 助言者

第6問 物語文＋発表メモ（時系列・人物の変化）

本文の要旨

架空の女性「Mariko Sato」の物語。若いころ聴力を失った元ピアノ教師が、振動で音を感じる方法を研究し、耳の聞こえない子どものための音楽教室を開いた。
最初は周囲に反対されたが、床に響く太鼓や手で触れるスピーカーを使い、子どもたちがリズムを体で感じられるようにした。
※設問の題材としての架空の人物です。

問 1 解答番号 25・26・27・28 **正解 ④→②→①→③** （3点・完答）

聴力を失う（第1段落）→ 床で太鼓を感じる（第2段落）→ 振動で教える方法を開発（第3段落）→ 6人で教室開始（第5段落）。

問 2 解答番号 29 **正解 ③** （3点）

床を通して一拍ごとに体で感じられた → ③。

問 3 解答番号 30 **正解 ①** （3点）

反論せず、保護者を無料体験に招き、目と耳をふさいで振動を体験させた → ①。

問 4 解答番号 31・32 **正解 ②・⑤（順不同）** （3点・順不同・完答）

② 自身の聴力喪失から新しい教え方を生んだ。⑤ 最後の言葉「正しい扉が見つかっていなかっただけ」。
① 子どもたちは完璧にリズムを合わせた。④ 風船・床の太鼓など身近な道具。

語句 vibration 振動 ／ deaf 耳の聞こえない ／ rhythm リズム ／ skeptical 懐疑的な ／ sign language 手話

第7問 論理的な文章＋スライド（要点・応用）

本文の要旨

「習慣はどう作られるか」の説明文。きっかけ・行動・報酬のループ、新しい習慣が定着するまでの日数は人や行動によって大きく違う（平均約66日、18〜254日）。
習慣を作るコツ：既存の習慣に結びつける、小さく始める、環境を変える。一日休んでも大きな影響はない。

問 1 解答番号 33 **正解 ④** （3点）

退屈（きっかけ）→ SNS を見る（行動）→ 新着メッセージを見る（報酬）→ ④。

問 2 解答番号 34 **正解 ②** （3点）

平均約66日、18〜254日と幅が大きい → ②。① は俗説として否定されている。

問 3 解答番号 35 **正解 ①** （3点）

第4段落：ときどき一日休んでも大きな影響はない → ①。② 逆。

問 4 解答番号 36・37 **正解 ③・④（順不同）** （4点・順不同・完答）

③ 既存の習慣（歯みがき）に結びつける＝habit stacking。④ 目につく所にギターを置く＝環境を変える。
① 小さく始めるの逆。② 意志に頼る。⑤ 一定の状況でくり返すことが大切。

問 5 解答番号 38 **正解 ③** （3点）

小さく始める（5語）＋朝食後という既存の習慣に結びつける＋机に単語帳を置く（環境）→ ③。

語句 cue きっかけ ／ routine 決まった行動 ／ reward 報酬 ／ automatic 自動的な ／ willpower 意志の力

第8問 複数の資料＋論説文の構成（統合・要約）

本文の要旨

テーマ「高校で投資・お金の教育を必修にすべきか」。記事（お金の知識と若者の借金の関係）、調査グラフ（お金について学んだ場所）、生徒・保護者・教員・銀行員の意見。
エッセイの構成メモを完成させる。

問 1 解答番号 39 **正解 ②** （3点）

題名 ”Money Lessons for Everyone” → ②。

問 2 解答番号 40・41 **正解 ①・④（順不同）** （4点・順不同・完答）

① Ms. Mori。④ Source A の調査結果。② Hana は信頼できるか不安。③ 短い講座だけでは効果が小さい。⑤ グラフで学校は12%と少ない。

問 3 解答番号 42 **正解 ③** （3点）

インターネット 29% ＞ 学校 12% → ③。最多は家族38%。何も学んでいない人も15%。

問 4 解答番号 43 **正解 ④** （3点）

Mr. Evans の反対意見（家庭の役割）に Ms. Mori の論点で応答 → ④。

問 5 解答番号 44 **正解 ①** （4点）

数年にわたる学習・実践的な例（Source A・Mr. Silva）、家庭との協力（Mr. Evans への配慮）→ ①。② 短い講座は効果が小さい。

語句 financial literacy 金融リテラシー ／ debt 借金 ／ budget 予算を立てる ／ compound interest 複利 ／ curriculum 教育課程
