You are reading reviews of a study app on a website for high school students.

FocusTree — Reviews (average rating: 4.1 / 5, 2,340 reviews)

FocusTree is a free app that grows a virtual tree while you study. If you leave the app to check social media, the tree dies. Users can pay $2.99 to unlock extra tree types and a weekly report of their study time.

Kenta, 17 (5 stars)	Before using this app, I checked my phone about every ten minutes. Now I can study for 50 minutes without touching it. Watching my forest grow is the best motivation ever.
Leah, 16 (3 stars)	It works, but the free version only shows today's total. I wanted to compare weeks, so I had to pay. Also, it does not stop notifications, so messages still appear on the screen.
Marco, 18 (2 stars)	I used it for a month. My study time went up at first, but after two weeks I started ignoring the dead trees. An app cannot fix a lack of willpower.

Developer's note: In a survey of 500 users, 72% said they studied longer after one month. A new version, coming in April, will include an option to silence notifications.

問1　Which is a fact about FocusTree, not an opinion?　マーク 4

① It is the best motivation for studying.
② An app cannot fix a lack of willpower.
③ The weekly report is only available to paying users.
④ It works well for everyone who uses it.

問2　Leah and Marco both suggest that the app _____.　マーク 5

③ the opinion of the three reviewers
④ data from schools that tested the app

第2問 解答・解説　12点満点

You are reading a travel blog written by a Japanese high school student who visited Scotland.

Lost (and Found) in the Highlands

On the fourth day of my homestay in Scotland, my host mother, Fiona, drove me to a small village in the Highlands. She had to visit a friend, so she left me at a café and said she would be back by three. "Don't go far," she warned. "The weather changes fast here."

The sun was shining, so after lunch I decided to walk to a lake I had seen on a sign. The path was clear at first, but after forty minutes a thick fog came down. I could not see the lake, the village, or even the path behind me. My phone had no signal.

I remembered something Fiona had told me on the first day: "If you get lost, stay where you are and listen." So I sat on a rock and waited. After a while I heard sheep bells. I followed the sound slowly and found a farmer, Mr. Campbell, moving his sheep. He walked me back to the village road.

Fiona was already at the café, looking worried. Instead of being angry, she bought me hot chocolate and asked me to tell the whole story. That evening, I wrote down every piece of advice she had ever given me in my notebook. I still carry it when I travel.

You are preparing for a reading group. You read the following story and complete the worksheet.

The Bakery Window

Every morning on her way to school, Nao passed a small bakery with a hand-painted window. Behind the glass, an old man named Mr. Sato arranged loaves in neat rows, and every morning he gave her a small nod. Nao always nodded back, but she never went inside. Bread there was more expensive than at the supermarket, and she was shy.

One rainy morning in her second year, the window was empty, and a paper sign said "Closed until further notice." Nao felt a strange sadness. She realized the nod had become part of her day, like the sound of her alarm clock.

A week later, the bakery opened again, but Mr. Sato was not there. Instead, a young woman stood behind the counter. Gathering her courage, Nao went in for the first time. The woman, Emi, explained that her grandfather had hurt his back and could no longer stand for long hours. "He told me about a girl in a blue uniform who nodded every morning," Emi said. "He wondered if you would miss him."

Nao bought a melon pan and wrote a short card: "Thank you for every good morning. Please get well soon." From then on, she stopped at the bakery every Friday. In March, when Mr. Sato came back to sit by the window for an hour each morning, Nao was the first customer to wave to him from inside the shop.

You are preparing a presentation for science class. You read the following article and make slides.

Why Cities Are Turning Off the Lights

For most of human history, night meant darkness. Today, more than 80% of the world's population lives under skies brightened by artificial light. Streetlights, advertising screens and office buildings make cities safer and more convenient, but scientists are finding that this "light pollution" has costs that are easy to overlook.

The first cost falls on wildlife. Many birds migrate at night and use the stars to find their way. Bright buildings confuse them, and in some cities thousands of birds die each year by flying into lit windows. Sea turtles are affected too: young turtles that hatch on beaches move toward the brightest horizon, which should be the sea. Near brightly lit roads, many crawl inland instead.

Humans pay a price as well. Our bodies produce a hormone called melatonin when it is dark, which helps us sleep. Studies suggest that bright light at night, especially blue-white light, reduces melatonin and may make it harder to fall asleep. Researchers are careful to say that more studies are needed to understand the long-term effects.

The good news is that light pollution is one of the easiest kinds of pollution to reduce. Unlike plastic in the ocean, it disappears the moment a switch is turned off. Some cities have replaced old streetlights with shielded lamps that point only downward. Others ask office towers to switch off decorative lighting during bird migration seasons. In one European city, these steps cut the light reaching the sky by about 40% while keeping streets as safe as before.

Of course, no one wants to return to completely dark streets. The goal, experts say, is not less light but better light: the right amount, in the right place, at the right time.

問1　マーク 32

Slide 1 (Introduction): Which is the best title for your presentation?

① Better Light, Not Less Light
② The History of the Streetlight
③ Why Cities Need More Advertising
④ Sea Turtles of the World

問2　マーク 33〜34

Slide 2 (Effects on Wildlife): Choose TWO examples that the article gives. (Choose two.)

① Birds crash into lit windows during migration.
② Fish stop eating near bright harbours.
③ Young turtles crawl away from the sea.
④ Insects become larger under streetlights.
⑤ Bats leave cities completely.

問3　マーク 35

Slide 3 (Effects on Humans): Which sentence best summarizes this part?

① Light at night has been proven to cause serious diseases.
② Light at night may disturb sleep, but more research is needed.
③ Blue-white light helps the body produce melatonin.
④ Humans are not affected by light pollution at all.

問4　Slide 4 (Solutions): Which point should be included?　マーク 36

① Turning off all streetlights at night
② Banning office buildings in city centres
③ Using lamps that shine only downward
④ Cleaning plastic from the ocean

問5　Slide 5 (Key Point): Why does the writer call light pollution "one of the easiest kinds of pollution to reduce"?　マーク 37

① Because it only affects a few cities.
② Because its effects stop as soon as the lights are turned off.
③ Because scientists already understand all of its effects.
④ Because people prefer darker streets.

You are writing an essay on the question "Should high schools allow students to use AI tools for homework?" You read opinions and data, and make an outline.

Step 1: Opinions

Ms. Park (English teacher)	Students who let AI write their essays skip the thinking that homework is meant to train. But AI can be a good tutor: it can explain grammar mistakes at midnight when no teacher is available. The tool is not the problem; how it is used is.
Yuto (high school student)	I use AI to check my math steps after I finish. It shows me where I went wrong, which is faster than waiting for the teacher to return my homework a week later.
Mr. Evans (university professor)	First-year students who relied on AI in high school often struggle to organize long reports by themselves. Schools should ban AI for written homework until students have learned to structure their own ideas.
Ms. Ito (parent)	My daughter's school has clear rules: AI can be used for checking and explaining, but students must write that they used it. Since then, she talks about her homework more, not less.
Dr. Shah (education researcher)	In our study, students who used AI only for feedback after writing improved their scores more than those who did not use it at all. Students who used it to produce answers improved the least.

Step 3: Data

Survey of 800 high school students	%
Have used AI for homework at least once	71
Used AI to write a whole answer at least once	29
Say AI explanations helped them understand	63
Say their school has clear rules about AI	34

問1　マーク 38

Step 1: Whose opinion is mainly based on research results?

① Ms. Park　② Yuto　③ Ms. Ito　④ Dr. Shah

問2　マーク 39

Step 1: Which person is most clearly AGAINST using AI for written homework?

① Ms. Park　② Mr. Evans　③ Ms. Ito　④ Dr. Shah

問3　マーク 40〜41

Step 2: Your position is "AI should be allowed, with rules." Choose the two people who best support you, and the point they share. (Choose one from each group.)

① (A) Ms. Ito and Dr. Shah / Yuto and Mr. Evans / Mr. Evans and Ms. Park
② (B) AI helps most when it is used for checking and feedback, not for producing answers.
③ (B) AI should replace teachers at night.
④ (B) Students should not tell teachers about AI.

問4　Step 3: Choose TWO pieces of data that best support "Schools need clear rules about AI." (The order does not matter.)　マーク 42〜43

① 71% have used AI for homework at least once.
② 29% have used AI to write a whole answer.
③ 63% say AI explanations helped them understand.
④ 34% say their school has clear rules.
⑤ The survey asked 800 students.

問5　Step 3: Which sentence best responds to Mr. Evans's concern in your essay?　マーク 44

① University professors do not understand high school students.
② If AI is used only for feedback after students write, they still practise organizing their own ideas.
③ Students should never write long reports.
④ AI will soon write better reports than humans, so structure is not important.

第8問 解答・解説　17点満点

問1 正解 ④ （2点）
根拠 Dr. Shah は ”In our study” と研究結果を示す。Yuto・Ms. Ito は個人の経験、Ms. Park は教師としての考え。

問2 正解 ② （3点）
根拠 Mr. Evans：”Schools should ban AI for written homework”。
ほかの選択肢 ① 使い方しだい（条件つき賛成）。③④ 使い方を決めれば効果がある。

問3 正解 (A) Ms. Ito and Dr. Shah (B) 1つ目の文（答えを作らせず、確認・フィードバックに使うと効果がある） （4点）
根拠 Ms. Ito：確認・説明に限るルールで会話が増えた（実例）。Dr. Shah：書いた後のフィードバックだけに使った生徒が最も伸びた（研究）。
ほかの組 Mr. Evans は禁止派。
配点 空所すべて正解で4点（2マーク）。

問4 正解 ②・④ （4点）
根拠 ② 3割近くが答えを丸ごと書かせた＝使い方の問題がある。④ ルールがはっきりしている学校は3分の1だけ＝ルールが足りない。
ほかの選択肢 ① 多くが使う事実で、ルールの必要性は直接示さない。③ 役立つという根拠（賛成側）。⑤ 調査の規模。
配点 2つとも正解で4点（2マーク）。

問5 正解 ② （4点）
根拠 「自分で構成する力がつかない」という心配に、「書いた後のフィードバックだけに使えば構成の練習は残る」（Dr. Shah の研究）で応える。
ほかの選択肢 ① 人への攻撃。③④ 自分の主張を弱める・極端。
